

Friendship In Of Mice And Men

How does having a companion affect one's life? In terms of having emotional stability, there is one thing in life that is needed, which is friends. Throughout the novel *Of Mice and Men*, John Steinbeck reveals that "a guy needs somebody." Without friends people suffer with loneliness and solitude, like most men on the ranch. The intelligent but also weak George, and the playful but strong Lennie have a friendship that is rather for both their mutual benefits. They each rely on each other's strengths which allows them to bring out the best in themselves.

George and Lennie's friendship is one that sets them apart. They are distinguished from all other characters in the story because they have each other to look after. When they arrive at the ranch many are confused and quite baffled as to why there are two men traveling together and who share a bond. "Ain't many guys travel around together... I don't know why. Lennie on the other hand is strong, and in many ways just as responsible for George as George is Lennie. George tells Lennie to never pick a fight, and as a result, Lennie is hesitant to defend himself or use his strength as a threat to

Andrew N. Rowan, 1984-06-30 Too much emotion and insufficient fact This paradox has long characterized the controversy surrounding animal research *Of Mice Models and Men* is the first exhaustive treatment of all areas empirical and conceptual relevant to the use of animals in research It is also the first study to combine regard for the welfare of laboratory animals with a knowledgeable acceptance of the continuing need for research involving animals The book has another rare quality It is virtually devoid of any of the emotional and exaggerated attacks that have characterized many of the other publications in this area Instead it presents in a manner accessible to both sides all the relevant historical social and scientific information required to form an opinion on the subject The book thus achieves a most difficult goal that of bridging the gap between researchers using animals and animal welfare advocates while pointing out the need for a more active program to promote laboratory animal welfare
