Curriculum Theory, Curriculum Theorising, and the Theoriser, 2020-12-29 Curriculum studies is at the core of the educational endeavour and informs what happens in every educational institution. As a result of its criticality or primacy, every educational practitioner appears to claim expertise in curriculum matters and what direction the field should take. In Africa, the curriculum practitioner has been given little or no space to theorise and orient the future of the field. In Africa, instead, European and American curriculum theorists have been allowed to exert a marked influence on the nature and direction of African theoretical and philosophical underpinnings. This situation raises fundamental questions about the future of education in Africa, and this volume explores and answers these questions relating to curriculum theory, theorising, and the theoriser by breaking traditions and experimenting on alternative approaches and pathways.
