Creative Pragmatics for Active Learning in STEM Education Connie Svabo, Michael Shanks, Chunfang Zhou, Tamara Carleton, 2025-04-10 This edited volume is an invitation to redesign STEM higher education It shows the way to active learning in diverse scenarios and provides educators leaders and policymakers with a visionary approach to active learning and hands on examples of how education can help students navigate complexity and unpredictability the challenges of contemporary society Featuring contributions from a diverse array of scholars and practitioners this book explores if supportLists endif Creative learning strategies if supportLists endif Dynamic teacher student interactions if supportLists endif Innovative assessment methods if supportLists endif The design of engaging learning environments Integrating science education with perspectives from pragmatism science and technology studies the humanities art and design this book presents a framework for understanding knowledge as an evolving performative process Through insightful case studies the book emphasises agency and creativity as essential elements of learning promoting interdisciplinary collaboration and flexible problem solving Chapters 1 and 7 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

Fundamental Concepts and Skills for Nursing - E-Book Patricia A. Williams, 2021-02-03 NEW Coverage of the NCSBN Clinical Judgment Measurement Model introduces students to the testing model used on the Next Generation NCLEX Exam NEW case studies and Next Generation NCLEX Exam style questions give students practice and prepare them for the Next Generation NCLEX Examination NEW photos and illustrations show critical skills and procedures NEW Updated guidelines include those from the American Heart Association

The Joint Commission National Pressure Ulcer Advisory Panel Dietary Guidelines and more NEW Expanded Evidence Based Practice boxes and best practices are highlighted throughout the book , Climate Change 2022 - Impacts, Adaptation and Vulnerability Intergovernmental Panel on Climate Change (IPCC),2023-06-22 The Working Group II contribution to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change IPCC provides a comprehensive assessment of the scientific literature relevant to climate change impacts adaptation and vulnerability The report recognizes the interactions of climate ecosystems and biodiversity and human societies and integrates across the natural ecological social and economic sciences It emphasizes how efforts in adaptation and in reducing greenhouse gas emissions can come together in a process called climate resilient development which enables a liveable future for biodiversity and humankind The IPCC is the leading body for assessing climate change science IPCC reports are produced in comprehensive objective and transparent ways ensuring they reflect the full range of views in the scientific literature Novel elements include focused topical assessments and an atlas presenting observed climate change impacts and future risks from global to regional scales Available as Open Access on Cambridge Core *Resources in Education* ,2000 **Contemporary Curriculum** John D. McNeil,2014-11-17 The Eighth Edition of Contemporary Curriculum In Thought and Action prepares readers to participate in the discussion of curriculum control and other matters important to K 12 and university educators The text highlights major philosophies and principles examines conflicting conceptions of curriculum and provides the intellectual and technical tools educators and administrators need for constructing and implementing curriculum **Resources for Teaching Middle School Science** Smithsonian Institution,National Academy of Engineering,National Science Resources Center of the National Academy of Sciences,Institute of Medicine,1998-03-30 With age appropriate inquiry centered curriculum materials and sound teaching practices middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them Resources for Teaching Middle School Science developed by the National Science Resources Center NSRC is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8 The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards This completely new guide follows on the success of Resources for Teaching Elementary School Science the first in the NSRC series of annotated guides to hands on inquiry centered curriculum materials and other resources for science teachers The curriculum materials in the new guide are grouped in five chapters by scientific area Physical Science Life Science Environmental Science Earth and Space Science and Multidisciplinary and Applied Science They are also grouped by type core materials supplementary units and science activity books Each annotation of curriculum material includes a recommended grade level a description of the activities involved and of what students can be expected to learn a list of accompanying materials a reading level and ordering information The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the

guide The criteria reflect and incorporate goals and principles of the National Science Education Standards The annotations designate the specific content standards on which these curriculum pieces focus In addition to the curriculum chapters the guide contains six chapters of diverse resources that are directly relevant to middle school science Among these is a chapter on educational software and multimedia programs chapters on books about science and teaching directories and guides to science trade books and periodicals for teachers and students Another section features institutional resources One chapter lists about 600 science centers museums and zoos where teachers can take middle school students for interactive science experiences Another chapter describes nearly 140 professional associations and U S government agencies that offer resources and assistance Authoritative extensive and thoroughly indexed and the only guide of its kind Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers school administrators teacher trainers science curriculum specialists advocates of hands on science teaching and concerned parents

HC 739 - Linking Emissions Trading Systems Great Britain. Parliament. House of Commons. Energy and Climate Change Committee, 2015 Carbon pricing is a necessary element in spurring climate change mitigation action In this report it is argued that emissions trading as an established and well recognised policy instrument for controlling greenhouse gas emissions is increasingly popular and spreading around the world As they develop emissions trading systems should be designed so that they are compatible with each other Aligning design elements early on will help improve the prospects of linking different systems in future and therefore maximise opportunities for cost effective emissions reductions As the world's oldest and largest market the EU Emission Trading System will play a critical role in facilitating linking between different markets Before it can do this however it must be seen as a credible market The issue of surplus allowances must be addressed urgently and there should be moves to remove these from the system as soon as possible Any new climate agreement must crucially allow parties to meet their Intended Nationally Determined Contributions INDCs by transferring parts of their contributions to other parties and financing emissions reduction activities in other countries The use of carbon markets will greatly improve the prospects of keeping global average temperatures below 2 C Any agreement reached at the UNFCCC COP 21 in Paris at the end of 2015 should promote the use of carbon markets and facilitate the future linking of emissions trading systems The UNFCCC could also play a critical role in providing basic standards including monitoring reporting and verification

Space Ethics Brian Patrick Green, 2021-10-19 Throughout history humans have explored new places making both good and bad moral decisions along the way As humanity proceeds to explore space it is important that we learn from the successes and not repeat the mistakes of the past This book provides the first comprehensive introduction to ethics as it applies to space exploration and use It examines real world case studies that exemplify the ethical challenges we face in exploring beyond Earth space debris militarization in space hazardous asteroids planetary protection the search for extraterrestrial life commercial and private sector activities in space space settlements very long duration missions and planetary scale

interventions Major themes include human health environmental concerns safety and risk governance and decision making and opportunities and challenges of multidisciplinary and international contexts Ideal for classroom use and beyond the book provides ways of thinking that will help students academics and policymakers examine the full range of ethical decisions on questions related to space exploration Environment Peter H. Raven,David M. Hassenzahl,Linda R. Berg,2012-04-13 Raven Hassenzahl and Berg s Environment threads the central themes of Systems and Sustainability throughout the text to help students understand the connection between the core concepts of Environmental Science and their daily lives The 8th edition features a rich collection of current case studies and in text examples highlighting these local and regional issues and providing students with the science and tools to understand apply and think critically about environmental science
