System National Research Council, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Committee on a Strategy to Optimize the U.S. Optical and Infrared System in the Era of the Large Synoptic Survey Telescope (LSST), 2015-06-26 New astronomical facilities such as the under construction Large Synoptic Survey Telescope and planned 30 meter class telescopes and new instrumentation on existing optical and infrared OIR telescopes hold the promise of groundbreaking research and discovery How can we extract the best science from these and other astronomical facilities in an era of potentially flat federal budgets for both the facilities and the research grants Optimizing the U S Ground Based Optical and Infrared Astronomy System provides guidance for these new programs that align with the scientific priorities and the conclusions and recommendations of two National Research Council NRC decadal surveys New Worlds New Horizons for Astronomy and Astrophysics and Vision and Voyages for Planetary Sciences in the Decade 2013 2022 as well as other NRC reports This report describes a vision for a U S OIR System that includes a telescope time exchange designed to enhance science return by broadening access to capabilities for a diverse community an ongoing planning process to identify and construct next generation capabilities to realize decadal science priorities and near term critical coordination planning and instrumentation needed to usher in the era of LSST and giant telescopes The G20 and the Future of International Economic Governance Mike Callaghan, Tristram Sainsbury, 2015-10-01 The G20 needs to be bold and pragmatic if it is to deal effectively with the global economy s big issues Since its establishment in 1999 the G20 has become a key international forum But it suffers from inherent design flaws and remains a work in progress When Australia

began its presidency of the 2014 summit in Brisbane many commentators suggested that Australia's chairing of the G20 would reinvigorate it. This timely book looks at what was achieved at the Brisbane Summit and what has happened in its wake. Crucially it explores what role the G20 could and should play in dealing with such pressing global issues as international taxation, trade, energy and climate change. Expert contributors, many of them former inside players, assess the impact of the summit in the context of the year's broader geopolitical challenges including Russia's temporary expulsion from the G8 and the failure of the US to ratify its governance reforms to the IMF. Taking stock, contributors question the effectiveness of the G20 and identify the reforms that are needed if it is to offer strong leadership in an integrated global economy. Together they ask what is the future of the G20 and other Gs.

Teaching and Digital Technologies Michael Henderson, Geoff Romeo, 2016-01-08

Teaching and Digital Technologies: Big Issues and Critical Questions helps both pre-service and in-service teachers to critically question and evaluate the reasons for using digital technology in the classroom. Unlike other resources that show how to use specific technologies and quickly become outdated, this text empowers the reader to understand why they should or should not use digital technologies when it is appropriate or not and the implications arising from these decisions. The text directly engages with policy, the Australian Curriculum, pedagogy, learning and wider issues of equity, access, generational stereotypes and professional learning. The contributors to the book are notable figures from across a broad range of Australian universities, giving the text a unique relevance to Australian education while retaining its universal appeal.

Teaching and Digital Technologies is an essential contemporary resource for early childhood, primary and secondary pre-service and in-service teachers in both local and international education environments.

The Book of What If...? Matt Murrie, Andrew R McHugh, 2016-04-19

From the creators of the What If Conference comes a quirky book that encourages kids to explore and engage with the world around them by asking more than eighty wild, absurd and thought-provoking questions. What if a book didn't just tell you how to think or what to know but rather encouraged you to think for yourself? What if there was a book that focused on asking questions instead of just answering them? The Book of What If does just that. What if you lived on a floating city? What if politicians were kids? What if broccoli tasted like chocolate? What if you could explore outer space? By asking these fun, open-ended questions, this book fosters greater critical thinking skills and gives kids a space to interact by breaking out a notebook to draw or write out their personal reactions or engage in entertaining exercises with family and friends. Plus, sidebars deepen the investigation with peer-to-peer insights, historical and current profiles, real-life examples and more, making for unlimited learning opportunities. Divided into sections: history, people, stuff and nature, along with four introductory texts to open up a dialogue about why it's important to be inquisitive and to always ask questions. The Book of What If is sure to be a hit with kids, teachers and parents alike. So ask a question and let the answers lead you on an exciting journey filled with endless opportunities to learn.

Canada and Climate Change William Leiss,2022-11-18 Pandemics massive earthquakes war and other catastrophes inspire immediate action because their casualties and destruction are immediately visible Climate change is an unyielding problem because its long range dangers are hidden and thus it is a global risk unlike anything in human experience The federal government recently announced aggressive climate targets for Canada We have committed to producing net zero greenhouse gas emissions by 2050 which will require major changes for our economy and way of life Canadian citizens need to understand why our most distinguished climate scientists and our senior political leaders think that we must meet this target Canada and Climate Change explains the importance of policies that will ensure we meet the net zero emissions target William Leiss provides a firm grasp on what climate change is and how scientists have described shifts in the earth s climate as they have occurred over hundreds of millions of years and as they are likely to occur in the

near future especially by the end of this century Leiss argues that citizens have a right to place their trust in what climate scientists tell us Canada and Climate Change is an essential primer on where we stand on the issue of climate change in Canada and what will unfold in the years ahead

Rethinking Virtual Places Erik Champion,2021-11-30 How would the humanities change if we grappled with the ways in which digital and virtual places are designed experienced and critiqued In Rethinking Virtual Places Erik Malcolm Champion draws from the fields of computational sciences and other place related disciplines to argue for a more central role for virtual space in the humanities For instance recent developments in neuroscience could improve our understanding of how people experience store and recollect place related encounters Similarly game mechanics using virtual place design might make digital environments more engaging and learning content more powerful and salient In addition Champion provides a brief introduction to new and emerging software and devices and explains how they help hinder or replace our traditional means of designing and exploring places Perfect for humanities scholars fascinated by the potential of virtual space Rethinking Virtual Places challenges both traditional and recent evaluation methods to address the complicated problem of understanding how people evaluate and engage with the notion of place
