Explaining Religious Party Strength Mário Rebelo,2022-12-30 Explaining Religious Party Strength explores why religious

political parties are electorally successful in some countries but not in others Drawing on insights from political science and sociology this book argues that religious parties are typically formed for defensive reasons reacting against state builders attempts to secularize public services such as education welfare and healthcare Building on these findings the author argues that the strength of religious parties is determined by the infrastructural power of the state Weak states that fail to provide adequate public services open up space for religious communities to build a dense network of private schools hospitals and charities which translates into votes for religious political parties By contrast strong states that provide efficient public services squeeze out private welfare providers undermining the electoral strength of religious political parties The author tests this theory through statistical analysis using a new dataset on all religious parties which have participated in national parliamentary elections between 1800 and 2015 He includes comparative historical analyses of Roman Catholic political parties in France and Italy and Sunni Islamic political parties in Egypt Turkey and Albania This book will interest students and scholars of religion and politics specifically those interested in party formation voting and political activism as well as policymakers

Violent Non-State Actors Zdenek Ludvík, 2023-05-15 *Violent Non State Actors* The Politics of Territorial Governance is an original in depth scholarly explanation of the impact of territorial penetration control and governance on the effectiveness of the activities of violent non state actors VNSA The theoretical framework operates with the assertion that a non linear causal relationship mediated through the capacity for territorial control and governance exists between the effectiveness of objective achievement and territorial penetration Using four case studies Zdenek Ludvík links these interrelated concepts of territorial penetration territorial control and territorial governance into an interrelated sequentially conceptualized causal framework To this end extensive and unique empirical material gathered to examine the activities of VNSA in considerable detail presents a wholly original and comprehensive method of measuring the degree of territorial capability of VNSA Zdenek Ludvík demonstrates

that there is no directly proportional relationship between territorial penetration and objective effectiveness since neither territorial penetration nor territorial control alone are sufficient to achieve increased effectiveness He shows that territorial penetration and territorial governance are necessary conditions for objective effectiveness since only when territorial penetration and territorial control are followed by territorial governance at the level of advanced wartime social order can VNSA hope to achieve a higher degree of effectiveness
