these volumes The papers of the first volume are organized in the following topical sections the project of the rehabilitation of Holy Sepulchre s Holy Aedicule as a pilot multispectral multidimensional novel approach through transdisciplinary and cooperation in the protection of monuments digital heritage novel educational approach for the preservation of monuments resilience to climate change and natural hazards conserving sustainably the materiality of structures and architectural authenticity and interdisciplinary preservation and management of cultural heritage And the papers of the second volume are organized in the following topical sections sustainable preservation and management lessons learnt on emblematic monuments cross discipline earthquake protection and structural assessment of monuments cultural heritage and pilgrimage tourism reuse circular economy and social participation as a leverage for the sustainable preservation and management of historic cities inception inclusive cultural heritage in Europe through 3D semantic modelling heritage at risk and advanced and non destructive techniques for diagnosis design and monitoring

Mathematical Modeling of Warfare and Combat Phenomenon Jeffrey Strickland, 2011-08-01 The primary goal of this book is to assist the student to develop the skills necessary to effectively employ the ideas of mathematics to solve military problems At the simplest level I seek to promote an understanding of why mathematics is useful as a language for characterizing the interaction and relationships among quantifiable concepts or in mathematical terms variables The text explores models of terrorism attrition search detection missile defense radar and operational reliability Throughout the text I emphasize the notion of added value and why it is the driving force behind military mathematical modeling For a given mathematical model to be deemed a success something must be learned that was not obvious without the modeling procedure Very often added value comes in the form of a prediction In the absence of added value the modeling procedure becomes an exercise not unrelated to digging a ditch simply to fill it back up again

Fire Controlman Second Class Robert L. Haskell, 1985

The Physics of Information Technology Neil Gershenfeld, 2000-10-16 The Physics of Information Technology explores the familiar devices that we use to collect transform transmit and interact with electronic information Many such devices operate surprisingly close to very many fundamental physical limits Understanding how such devices work and how they can and cannot be improved requires deep insight into the character of physical law as well as engineering practice The book starts with an introduction to units forces and the probabilistic foundations of noise and signalling then progresses through the electromagnetics of wired and wireless communications and the quantum mechanics of electronic optical and magnetic materials to discussions of mechanisms for computation storage sensing and display This self contained volume will help both physical scientists and computer scientists see beyond the conventional division between hardware and software to understand the implications of physical theory for information manipulation

[Terahertz Science and Technology for Military and Security Applications](#) Dwight L. Woolard, James O. Jensen, R. Jennifer Hwu, 2007 The inherent advantages and potential payoffs of the terahertz THz regime for military and security applications serve as an important driver for interest in new THz related science and

technology In particular the very rapid growth in more recent years is arguably most closely linked to the potential payoffs of THz sensing and imaging THz S I This book presents some of the leading fundamental research efforts towards the realization of practical THz S I capabilities for military and security applications Relevant subjects include theoretical prediction and or measurement of THz spectroscopic phenomenon in solid state materials such as high explosives e g HMX PETN RDX TNT etc carbon fiber composites biological agents e g DNA RNA proteins amino acids and organic semiconductor nanostructures Individual papers also address the effective utilization of state of the art THz frequency technology in military and security relevant scenarios such as standoff S I screening of packages and personnel and perimeter defense Technical papers introduce novel devices and or concepts that enhance THz source and detector performance enabling completely new types of sensor functionality at THz frequency e g detection at nanoscale molecular levels and defining new and innovative sensing modalities e g remote personnel identification for defense and security Therefore the collective research presented here represents a valuable source of information on the evolving field of THz S I for military and security applications
