

For those anatomical regions that have “complete” or “limited” ultrasound codes note the elements that comprise a complete exam

Complete

- Report should contain a description of these elements.
- Or else the reason that an element could not be visualized i.e. obscured by bowel gas or surgically absent.
- Or simple physician documentation that unable to examine all organs must be present

Limited

- If less than required elements for a “complete” exam are reported (limited number of organs or limited portion of region evaluated)
- In such cases limited code for that anatomical region should be coded once per patient examination.
