## Marmoset

Rainforest location: understorey

Marmosets are about the same size as a squirrel and are members of the monkey family. They mainly eat insects, fruit and leaves, but in some places they live on the sap and gum that they take out of trees with their long teeth. Young are looked after by other adult marmosets in addition to their mother and older siblings.

## Jaguar

Rainforest location: understorey

The jaguar is the biggest member of the cat family found in the Amazon Rainforest. They are good climbers and usually sleep in the lower branches of trees, where they remain well camouflaged. Jaguars love meat and will eat almost any living thing including fish and small alligators. They are becoming rare as their numbers are dropping rapidly.

## Chameleon

Rainforest location: understorey

The chameleon is a member of the lizard family and has the ability to change the colour of its skin to blend in with its surroundings. It catches insects by shooting out its very long tongue at high speed. Chameleons can rotate their large eyes through a complete turn and are able to focus on two different things at the same time.
