Sekar,Ayhan ESI,R. Senthil Kumar,2025-04-29 The Conference dealt with one of the most important problems faced in International development in Pure Mathematics and Applied mathematics development in engineering such as Cryptography, Cyber Security, Network Operations Research, Heat Equation, and so forth The aim of the conference was to provide a platform for researchers, engineers, academicians, as well as industrial professionals to present their research results and development activities in Pure and Applied Mathematics and its applied technology It provided opportunities for the delegates to exchange new ideas and application experiences to establish business or research relations and to find global partners for future collaboration Middleware Solutions for Wireless Internet of Things Paolo Bellavista,Carlo Giannelli,Sajal K. Das,Jiannong Cao,2019-07-15 The proliferation of powerful but cheap devices together with the availability of a plethora of wireless technologies has pushed for the spread of the Wireless Internet of Things WIoT which is typically much more

heterogeneous dynamic and general purpose if compared with the traditional IoT. The WIoT is characterized by the dynamic interaction of traditional infrastructure side devices e.g. sensors and actuators provided by municipalities in Smart City infrastructures and other portable and more opportunistic ones such as mobile smartphones opportunistically integrated to dynamically extend and enhance the WIoT environment. A key enabler of this vision is the advancement of software and middleware technologies in various mobile related sectors ranging from the effective synergic management of wireless communications to mobility adaptivity support in operating systems and differentiated integration and management of devices with heterogeneous capabilities in middleware from horizontal support to crowdsourcing in different application domains to dynamic offloading to cloud resources only to mention a few. The book presents state of the art contributions in the articulated WIoT area by providing novel insights about the development and adoption of middleware solutions to enable the WIoT vision in a wide spectrum of heterogeneous scenarios ranging from industrial environments to educational devices. The presented solutions provide readers with differentiated point of views by demonstrating how the WIoT vision can be applied to several aspects of our daily life in a pervasive manner.

Reconfigurable Obfuscation Techniques for the IC Supply Chain Zain Ul Abideen, Samuel Pagliarini, 2025-01-11 This book explores the essential facets of security threats arising from the globalized IC supply chain. Contemporary semiconductor companies navigate a globalized IC supply chain exposing them to various threats such as Intellectual Property IP piracy, reverse engineering, overproduction, and malicious logic insertion. Several obfuscation techniques including split manufacturing, design camouflaging, and Logic Locking LL have been proposed to counter these threats. This book describes a new security method for the silicon industry the Tunable Design Obfuscation Technique which uses a reconfigurability feature in the chip.
