G. Jung, 2021-12-14 In 1936 and 1937 C G Jung delivered two legendary seminars on dream interpretation the first on Bailey Island Maine the second in New York City *Dream Symbols of the Individuation Process* makes these lectures widely available for the first time offering a compelling look at Jung as he presents his ideas candidly and in English before a rapt American audience *Sleep, Its Physiology, Pathology, Hygiene, and Psychology* , 1897
Elements of Translation Ali Darwish, 2010 Betweenity Judy Gammelgaard, 2018-09-03 From its inception psychoanalysis has sought to effect a cure through the therapeutic relationship between analyst and analysand *Betweenity* looks at what happens when the established framework of the psychoanalytic process is challenged by those with borderline personalities In this book Judy Gammelgaard looks at how we might understand the analysand who is unable to engage with therapy and how we might bring them to a point where they are able to do so Areas of discussion include the border between psychiatry and psychoanalysis early mother child relationships the splitting of the ego This book will be essential reading for all psychoanalysts psychotherapists and practitioners wishing to learn more about working with borderline personality structures and disorders Economics for Humanity Mitsuaki Okabe, 2024-08-26 Economics is often referred to as the queen of social sciences This is because mainstream economics has been established as an elegant academic discipline by assuming mankind simply to be homo economicus an image of human beings showing interest in only material fulfilment and acting solely in his interest This book challenges this basic perception of human beings By replacing it with a more realistic and multifaceted human motive as supported by research in various academic disciplines the book tries to provide a novel

and more plausible picture of human society Specifically the book takes in such human aspects as pursuing well being forming human networks and the realisation of potential of ability Thus if we try to better understand human motives and the society it becomes necessary to replace the conventional two sector market government social model with a more general and theoretically superior social model the three sector model consisting of market government non profit sectors This book demonstrates the validity of this new view by utilising basic principles of economic policy and social welfare analyses Moreover the book has introduced a newly developing practical philosophy in Japan over the last 50 years to achieve both individual well being and better human society

Critical Theories of Anti-Semitism Jonathan Judaken, 2024-06-04 Despite its persistence and viciousness anti-Semitism remains undertheorized in comparison with other forms of racism and discrimination How should anti-Semitism be defined What are its underlying causes Why do anti-Semites target Jews In what ways has Judeophobia changed over time What are the continuities and disconnects between medieval anti-Judaism and the Holocaust How does criticism of the state of Israel relate to anti-Semitism And how can social theory illuminate the upsurge in attacks on Jews today Considering these questions and many more this book is at once a philosophical reflection on key problems in the analysis of anti-Semitism and a history of its leading theories and theorists Jonathan Judaken explores the methodological and conceptual issues that have vexed the study of Judeophobia and calls for a reconsideration of the definitions categories and narratives that underpin overarching explanations He traces how a range of thinkers have wrestled with these challenges examining the theories of Jean Paul Sartre the Frankfurt School Hannah Arendt and Jean Fran ois Lyotard alongside the works of sociologists Talcott Parsons and Zygmunt Bauman and historians Leon Poliakov and George Mosse Judaken argues against claims about the uniqueness of Judeophobia demonstrating how it is entangled with other racisms Islamophobia Negrophobia and xenophobia

Critical Theories of Anti-Semitism not only urges readers to question how they think about Judeophobia but also draws them into conversation with a range of leading thinkers whose insights are sorely needed in this perilous moment

Sleep Marie de Manacéïne, 1897

Alternative perspectives on psychiatric classification Peter Zachar, Drozd St. Stoyanov, Massimiliano Aragona, Assen Jablensky, 2014-11-06 Many of the current debates about validity in psychiatry and psychology are predicated on the unexpected failure to validate commonly used diagnostic categories The recognition of this failure has resulted in what Thomas Kuhn calls a period of extraordinary science in which validation problems are given increased weight alternatives are proposed methodologies are debated and philosophical and historical analyses are seen as more relevant than usual In this important new book in the IPPP series a group of leading thinkers in psychiatry psychology and philosophy offer alternative perspectives that address both the scientific and clinical aspects of psychiatric validation emphasizing throughout their philosophical and historical considerations This is a book that all psychiatrists as well as philosophers with an interest in psychiatry will find thought provoking and valuable

Bordering Professor Anders Linde-Laursen, 2012-11-28 What is a border This seemingly simple question is here answered via a multidisciplinary study of the cultural geographic and historic existence of borders and the ways that they have shaped our world Using the Danish Swedish border to illustrate the actions of groups and individuals engaged in bordering since the 1600s this richly theoretical discussion highlights the complexities of political and cultural identity processes Comparative perspectives are brought together to produce a thoughtful analysis of how such processes function and of how borders work on both an imagined nationhood and experiential personal level The author also examines how throughout history people have lived with and influenced or been influenced by borders why some borders remain uncontested while others repeatedly provoke cross border conflicts and how today's bordering processes may be deliberately manipulated

Selected Essays in Criticism L. C. Knights, 1981-06-04 This is a selection of essays by one of the most distinguished of modern literary critics L C Knights published as a companion volume to the selection of Professor Knights Shakespearean essays which appeared in 1979 The essays span almost four decades of critical work on authors as diverse as Marlowe George Herbert Clarendon and Henry James At the centre of each essay is an attempt to elicit some essential quality in the author or authors discussed Although

each can be read as an isolated critical essay the different pieces are linked by a pervasive interest in the conditions social or personal out of which particular works emerged and in the way in which major works of the imagination are renewed as they are re interpreted in successive generations Throughout the underlying assumption is that literary criticism needs to be pure the result of direct exposure to particular works but that it cannot remain purely literary if only because the meaning of literature includes its effects on the lives and conduct of individual human beings
