Sustainable Construction Materials and Technologies

Yoon-Moon Chun, Peter Claisse, Tarun R. Naik, Eshmaiel Ganjian, 2020-11-26 The construction materials industry is a major user of the world's resources. While enormous progress has been made towards sustainability, the scope and opportunities for improvements are significant. To further the effort for sustainable development, a conference on Sustainable Construction Materials and Technologies was held at Coventry University, Coventry, U.K. from June 11th-13th, 2007, to highlight case studies and research on new and innovative ways of achieving sustainability of construction materials and technologies. This book presents selected important contributions made at the conference. Over 190 papers from over 45 countries were accepted for presentation at the conference, of which approximately 100 selected papers are published in this book. The rest of the papers are published in two supplementary books. Topics covered in this book include sustainable alternatives to natural sand, stone and Portland cement in concrete; sustainable use of recyclable resources such as fly ash, ground municipal waste slag, pozzolan, rice husk ash, silica fume, gypsum, plasterboard, drywall, and lime in construction; sustainable mortar, concrete, bricks, blocks, and backfill; the economics and environmental impact of sustainable materials and structures; use of construction and demolition wastes and organic materials; straw bale, hemp, etc. in construction; sustainable use of soil, timber, and wood products; and related sustainable construction and rehabilitation technologies.

Poor Richard, an Almanac for Architects and Planners Mark David Aicp, Mark David Major, Julia Starr Sanford, 2013-04-13 *Poor Richard: An Almanac for Architects and Planners* collects together commentary, proverbs, and witticisms that originally appeared via *The Outlaw Urbanist*. Drawing inspiration from American Founding Fathers Benjamin Franklin and Thomas Jefferson, as well as many others, author Mark David Major crafts anew a series of astute observations, common sense proverbs, and general rules of thumb for anyone interested in the architecture, urban design, and planning of our cities. Often eloquent, occasionally biting, and always insightful, these witticisms offer a valuable resource for the entire year: daily reminders for everyone involved in the building of our cities, of their better angels, and warning them against the worse demons of human nature. The unmistakable message of *Poor Richard: An Almanac for Architects and Planners* with foreword by Julia Starr Sanford is: we can do better for our cities; we must do better for our cities; and before the 20th century, we did do better for our cities.
