The Committee on Planetary and Lunar Exploration (COMPLEX), a standing committee of the Space Studies Board of the National Research Council, was asked to examine the scientific content of this new program. The goals of this report are the following:

- Review the state of knowledge of the planet Mars with special emphasis on findings of the most recent Mars missions and related research activities.
- Review the most important Mars research opportunities in the immediate future.
- Review scientific priorities for the exploration of Mars identified by COMPLEX and other scientific advisory groups and their motivation and consider the degree to which recent discoveries suggest a reordering of priorities.
- Assess the congruence between NASA's evolving Mars Exploration Program plan and these recommended priorities and suggest any adjustments that might be warranted.
