R. Wallace,2015-08-11 Why are prisoners horribly abused in some wars but humanely cared for in others In Life and Death in Captivity Geoffrey P R Wallace explores the profound differences in the ways captives are treated during armed conflict Wallace focuses on the dual role played by regime type and the nature of the conflict in determining whether captor states opt for brutality or mercy Integrating original data on prisoner treatment during the last century of interstate warfare with in depth historical cases Wallace demonstrates how domestic constraints and external incentives shape the fate of captured enemy combatants Both Russia and Japan for example treated prisoners very differently in the Russo Japanese War of 1904 5 and in World War II the behavior of any given country is liable to vary from conflict to conflict and even within the same war

Democracies may be more likely to treat their captives humanely yet this benevolence is rooted less in liberal norms of nonviolence than in concerns over public accountability When such concerns are weak or absent democracies are equally capable of brutal conduct toward captives In conflicts that devolve into protracted fighting belligerents may inflict violence against captives as part of a strategy of exploitation and to coerce the adversary into submission When territory is at stake prisoners are further at risk of cruel treatment as their captors seek to permanently remove the most threatening sources of opposition within newly conquered lands By combining a rigorous strategic approach with a wide ranging body of evidence Wallace offers a vital contribution to the study of political violence and wartime conduct

Lumsdaine,2017-03-14 Volume III in the series Studies in Social Psychology in World War II The Army proved to be a worldwide laboratory for film research and research on other means of getting across both technical information and indoctrination Findings are of direct importance to film makers educators Originally published in 1971 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Decline of Neutrality 1914-41 Nils Ørvik,2024-12-06 The Decline of Neutrality 1971 examines the impartial disinterested neutrality as it was codified in the Hague Convention in 1907 and the changes the concept underwent from the beginning of World War I in 1914 up to Pearl Harbor December 1941 It deals with the different stages of neutrality during that period and looks at the reasons why the policy no longer worked Some consideration has also been given to the attempts of uniting weak and strong neutrals in a common defence of neutral rights

Models for Non-Modelers Göran Djurfeldt,2023-09-19 Models for Non Modelers focuses not on how to design models but on how to understand and critically appraise them Data and statistical models are widely used in disciplines such as epidemiology climate science and systems design but it can be difficult for those without the necessary training to understand and implement them This book is for non modelers especially social scientists Through extensive examination of some common models both in visual and text form this book shows these non modellers how to understand the problems both in the logic and implementation of such models It includes in depth worked examples and boxed text for more technical aspects It does not require the reader to have in depth mathematical knowledge Also working through some common models in epidemiology and climate change scholarship it examines AI and the problem of causality This book will be suitable for graduate students and researchers in the social sciences who would like to learn more about how to assess models and the steps they need to take to apply them in their own research as well as for those taking first courses in quantitative methods and statistical analysis for research data analysis
