This lavishly illustrated book covers physical geography history and economic and political systems of the world's most populous country. The major focus is on geographical issues in China's contemporary development: agriculture, population, urbanization, resource and energy, and environment. The lead author of the book has taught relevant courses in China for three decades and authored and edited multiple textbooks for Chinese students. This book will appeal to undergraduate students of geography and related disciplines with a regional focus on China and to the general reader who wants to learn different geographical aspects of modern China with little academic background in geography.

Social Change and Social Policy in Contemporary China Linda Wong, Stewart MacPherson, 1995. Since Mao's demise, China has embraced economic modernization with a vengeance. The stunning growth that followed the reforms and the effects on her political institutions has captured world attention. Nevertheless, there has been a dearth of studies on social change and social policy in this period of rapid transition. This text scrutinizes the social change process and the reform challenge, assesses the social policy responses, and analyzes key policy issues affecting China's 1.2 billion people. It not only offers an in-depth dissection of the subject but also draws out salient points in the policy and development debates and places the Chinese experience in a comparative perspective. All the contributors are academics from Hong Kong who have drawn upon many years of research in China and skills of social policy analysis to offer a unique review of social developments in the world's number three economic power.

Force and Contention in Contemporary China Ralph A. Thaxton, Jr, 2016-08-04. Why is contemporary China such a politically contentious place? Relying on the memories of the survivors of the worst catastrophe of Maoist rule and documenting the rise of resistance and protest at the grassroots level, this book explains how the terror, hunger, and loss of the socialist past influence the way in which people in the deep countryside see and resist state power in the reform era up to the present-day repression of the People's Republic of China's central government. Ralph A. Thaxton Jr provides us with a worm's-eye view of an unknown China, a China that cannot easily or fully be understood through the academy theories and frameworks of why and how rural people have engaged in contentious politics. This book is a truly unique and disturbing look at how rural people relate to an authoritarian political system in a country that aspires to become a stable world power.
