Perspectives Tien-Chi Huang, Maria Limniou, Tai-Kuei Yu, Shin Jia Ho, 2024-06-19 In 2016 Japan proposed Society 5.0 a concept in which innovation and technology are used to solve social problems. The core elements of Society 5.0 include problem solving and value creation, interdisciplinary skills, diverse opportunities, resilience, and environmental harmony. This concept also highlights the United Nations 17 Sustainable Development Goals (SDGs), which all individuals and organizations need to face. The promotion of the SDGs from a psychological perspective is believed to be beneficial and aligns with the intention of the United Nations Sustainable Development Goals. SDGs can be examined from a microscopic level to understand individuals' mental processes and attitudes toward them. Investigating the relationships between the SDGs and social and positive psychology can benefit their promotion. Discussing the SDGs from a psychological perspective aligns with the intention of the United Nations.

Knowledge in Action Annemarie van Paassen, Jolanda van den Berg, Eveliëne Steingröver, Renate Werkman, Bas Pedrolí, 2011-10-05 Wageningen University and Research Centre is known for its practical and societally relevant research in spatial development. Stakeholders currently put much emphasis on participatory processes in landscape planning procedures. This poses a special challenge for research: What role does research play in our present world, characterised by complexity, competing claims, and development needs, and an increased concern for climate change and environmental impact? In the book *Knowledge in Action* we explore different types of transdisciplinary research that scientists engage in. Depending on the societal context and the interests of local citizens, researchers apply different research approaches to optimally incorporate the various points of view in their research and promote processes enhancing dialogue and shared results. In the book, authors present their research experiences, their theoretical inspiration, the research methodology applied to consult, share, and collaborate with societal actors in order to create options for change. The book includes several striking examples from The Netherlands, both successful and less effective, and also innovative examples from communities in Africa and Asia. The authors reflect on opportunities, problems, and dilemmas they had to deal with. They especially address how far the role and theoretical perspectives of collaborative researchers can lead them in action research. Can they limit themselves to joint knowledge production and learning processes, or should they engage in strategic positioning, advocacy, and entrepreneurship to make it happen? The book discusses the issues that researchers should consider when they position their research activities within ongoing developments at landscape level. Read the book and judge for yourself.

Regulation by Litigation Andrew P. Morriss, Bruce Yandle, Andrew Dorchak, 2009-01-01 Examines three major cases in which litigation was used to achieve regulatory ends: the EPA's suit against heavy-duty diesel engine manufacturers, asbestos and silica dust litigation by private attorneys, and private and state lawsuits against cigarette manufacturers. Provided by publisher.

The Indirect Effect of Direct Legislation Frederick J. Boehmke, 2005 To demonstrate this, the author models the incentives that the initiative process creates for interests to organize and for how they communicate their preferences to policy makers. Interests that

represent a broader range of the public are found to gain the most from the option to propose initiatives implying that the set of organized interests in initiative states should reflect this advantage Ironically an effect of direct legislation is to potentially increase the effectiveness of special interest lobbying in state legislatures in a sense the opposite of the direct control that gives direct legislation its theoretical appeal Yet the clear effect is one of empowering voices that traditionally had very little effect in the legislative process

Manning,Lisa M. Holmes,Jennifer Bowie,2025-01-30 Judicial Process in America Thirteenth Edition by Robert Carp Kenneth Manning Lisa Holmes and Jennifer Bowie is a market leading and comprehensive textbook for both academic and general audiences The book explains the link between the courts public policy and the political environment Considering the courts from every level the authors cover judges lawyers litigants and the variables at play in the judicial decision making process the impact of those decisions on American citizens and what the consequences are for the United States today **Political Parties and Interest Groups in Norway** Elin Haugsgjerd Allern,2024-10-31 How do today s political parties relate to other organisations Do they prefer rather distant relationships with a wide range of interest groups or have they virtually detached themselves from civil society altogether Scholars seem to agree that traditionally close relationships such as those between social democratic parties and trade unions have grown weaker since the 1960s But to date only limited systematic research has been conducted While parties and interest groups attract a great deal of attention from political scientists the links between them have been largely overlooked This book is an attempt to bridge the gap starting from the party side of the relationship It throws new light on the topic by presenting a theory driven comprehensive study of Norway s seven major political parties and their relationships with interest groups at the beginning of the new millennium Based on original and extensive data including party documents in depth interviews with key players and a survey of national party elites Elin Haugsgjerd Allern paints a nuanced picture of the nature and significance of these relationships and the factors that shape them A major conclusion is that Norway s parties tend to maintain rather distant but wide ranging relationships with interest groups today However some parties still have fairly strong links with their traditional associates and a narrower network of links with other groups Hence Allern also shows that significant differences exist between parties that are apparently exposed to the same social political and institutional environment **Inside the Campaign Finance Battle** Anthony

Corrado,Thomas E. Mann,Trevor Potter,2004-05-26 In 2002 Congress enacted the Bipartisan Campaign Reform Act BCRA the first major revision of federal campaign finance law in a generation In March 2001 after a fiercely contested and highly divisive seven year partisan legislative battle the Senate passed S 27 known as the McCain Feingold legislation The House responded by passing H R 2356 companion legislation known as Shays Meehan in February 2002 The Senate then approved

the House passed version and President George W Bush signed BCRA into law on March 27 2002 stating that the bill had flaws but overall improves the current system of financing for federal campaigns The Reform Act was taken to court within hours of the President s signature Dozens of interest groups and lawmakers who had opposed passage of the Act in Congress lodged complaints that challenged the constitutionality of virtually every aspect of the new law Following review by a special three judge panel the case is expected to reach the U S Supreme Court in 2003 This litigation constitutes the most important campaign finance case since the Supreme Court issued its decision in Buckley v Valeo more than twenty five years ago The testimony submitted by some of the country s most knowledgeable political scientists and most experienced politicians constitutes an invaluable body of knowledge about the complexities of campaign finance and the role of money in our political system Unfortunately only the lawyers political scientists and practitioners actually involved in the litigation have seen most of this writing until now Inside the Campaign Finance Battle makes key testimony in this historic case available to a general readership in the process shedding new light on campaign finance practices central to the congressional debate on the reform act and to the landmark litigation challenging its constitutionality The Nature of Belief Systems Reconsidered
