

## Seeking Circle Angles with Answers

In this lesson it is your job to discover relationships that exist in circles.

Using the Exploration sheet "Circle Angle Examples" explore some relationships between arcs and angles for angles that are inscribed within a circle, angles formed on the interior of circles, and angles formed exterior to the circle.

### Inscribed Angles

Using the first Circle examples, fill in the following chart and answer the questions.

| Measure of Inscribed Angle | Measure of Intercepted Arc |
|----------------------------|----------------------------|
| 74.5°                      | 149°                       |
| 45°                        | 90°                        |
| 82°                        | 164°                       |
| 15°                        | 30°                        |
|                            |                            |

What relationship do you notice between the measure of the inscribed angle and the measure of the intercepted arc?

Each Inscribed angle is half of the intercepted arc, or the intercepted arc is double the inscribed angle.

Can you generalize this relationship into a rule that will always work?

$\text{Inscribed } \angle = \frac{1}{2} \text{ intercepted arc}$

### Angles formed in the Interior of a Circle

Using the second set of circles, investigate the angles formed in the interior of a circle.

| Angle Formed | Larger Arc | Smaller Arc | Sum of the two Arcs | $\frac{1}{2}$ (Sum of the two Arcs) | Difference of the two Arcs | $\frac{1}{2}$ (Difference of the two Arcs) |
|--------------|------------|-------------|---------------------|-------------------------------------|----------------------------|--------------------------------------------|
| 88°          | 116°       | 60°         | 176°                | 88°                                 | 56°                        | 28°                                        |
| 105°         | 118°       | 92°         | 210°                | 105°                                | 26°                        | 13°                                        |
| 120°         | 155°       | 85°         | 240°                | 120°                                | 70°                        | 35°                                        |
| 83°          | 126°       | 40°         | 166°                | 83°                                 | 86°                        | 43°                                        |
