Charles Darwin

Selected Modifications English Edition:

The Origin of Species by Means of Natural Selection Charles Darwin, 1889 **The origin of species by means of natural selection...with additions and corrections from 6th and last English ed** Charles Darwin, 1898 **The Origin of Species by Means of Natural Selection, Or, The Preservation of Favored Races in the Struggle for Life** Charles Darwin, 1896 Charles Darwin's Works: The origin of species by means of natural selection...with additions and corrections from 6th and last English ed Charles Darwin, 1896 **Selected Topics in the History of Biochemistry. Personal Recollections. Part III** G. Semenza, R. Jaenicke, 2012-12-02 As in Volumes 35 and 36 the chapters in this new volume complement with personal recollections the History of Biochemistry that was covered in the Comprehensive Biochemistry Series Volumes 30-33 by M. Florkin and Volume 34A by P. Laszlo. The biographical and autobiographical chapters will convey to the reader a lively albeit at times subjective view of the scientific and social environment in which the authors have worked, resulting in new concepts and theories on the biological sciences.

Selected Topics in Integral Geometry Izrail' Moiseevich Gel'fand, Semen Grigor'evich Gindikin, Mark Iosifovich Graev, 2003-09-02 The miracle of integral geometry is that it is often possible to recover a function on a manifold just from the knowledge of its integrals over certain submanifolds. The founding example is the Radon transform introduced at the beginning of the 20th century. Since then many other transforms were found and the general theory was developed. Moreover many important practical applications were discovered, the best known but by no means the only one being to medical tomography. The present book is a general introduction to integral geometry, the first from this point of view for almost four decades. The authors, all leading experts in the field, represent one of the most influential schools in integral geometry. The book presents in detail basic examples of integral geometry problems such as the Radon transform on the plane and in space, the John transform, the Minkowski-Funk transform, integral geometry on the hyperbolic plane and in the hyperbolic space, the horospherical transform and its relation to representations of $SL(2, \mathbb{C})$, integral geometry on quadrics, etc. The study of these examples allows the authors to explain important general topics of integral geometry such as the Cavalieri conditions, local and nonlocal inversion formulas, and overdetermined problems. Many of the results in the book were obtained by the authors in the course of their career-long work in integral geometry.

Darwinian Heresies Abigail Lustig, Robert J. Richards, Michael Ruse, 2004-08-30 In *Darwinian Heresies* which was originally published in 2004 prominent historians and philosophers of science trace the history of evolutionary thought and challenge many of the assumptions that have built up over the years Covering a wide range of issues starting in the eighteenth century *Darwinian Heresies* brings us through the time of Charles Darwin and the Origin and then through the twentieth century to the present It is suggested that Darwin's true roots lie in Germany not his native England that Russian evolutionism is more significant than many are prepared to allow and that the true influence on twentieth century evolution biology was not Charles Darwin at all but his often despised contemporary Herbert Spencer The collection was intended to interest to excite to infuriate and to stimulate further work

Engineering Risks Ulrich Hauptmanns, Wolfgang Werner, 2012-12-06 Encouragement by colleagues and a considerable increase in the use of probabilistic analyses since the publication of the German edition in 1987 have motivated this English version A mere translation was inappropriate because a number of important studies completed in recent years had to be included among them the assessment of the risks of five nuclear power plants in the United States of America and the German Risk Study Phase B The opportunity was taken to elaborate on some concepts which have gained importance of late such as accident management An update of international safety goals was also made however this can only be a momentary view of a field subjected to frequent change Thanks are due to the Springer Verlag for the careful editing and production of the book
