No Child Left Behind William Hayes, 2008-08-14 While few would quarrel with the goal of the No Child Left Behind legislation the nation is badly divided over whether the law is having a positive effect on our schools At the same time it is also true that most Americans including many professional educators have only a limited understanding of the content and scope of the legislation As we are currently engaged in a national debate about the future role of the federal government in the field of education it is essential that people become better informed about the history content and results of No Child Left Behind This book is a valuable tool informing the current discussion on the reauthorization of the law As a result the reader will be better able to make up his own mind as to the direction we should take as a nation in pursuing the noble objective of ensuring that no child is left behind

An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

Failure Vicki E. Alger, 2016-07-01 A comprehensive account and frank assessment of federal involvement in education is long overdue Education policy expert Vicki E Alger remedies this deficiency with her book *Failure: The Federal Miseducation of America's Children* As its title indicates *Failure* makes no effort to sugar coat its findings Created in 1979 after a lobbying campaign that spanned generations the Department of Education has failed to live up to its promises Federal involvement whether related to testing funding or academic curricula has failed to abide by the Constitution's implication that education must remain the domain only of state and local governments and private institutions Most of all the central government's pervasive meddling in education has failed America's school children and their parents Education policy has long been mired in controversies often with opposing sides missing the mark *Failure* helps us step back from the skirmish du jour and redirects our focus to the big picture showing us what's gone wrong over the decades and the institutional causes of these failures It also offers a bold blueprint for returning the federal government to its constitutional role and for cultivating an educational system that meets the needs of students and parents rather than bureaucrats Concerned citizens of every stripe will benefit from *Failure's* history of federal education policy its brutally honest report card for the Department of Education its look at education systems across the globe and its ambitious policy recommendations *Failure* might even succeed in reframing the way the federal education establishment thinks about education policy

High Stakes Accountability Jennifer King Rice, Christopher Roellke, 2009-01-01 In this third volume of *Research in Education* Fiscal Policy and Practice editors Jennifer King Rice and Christopher Roellke have assembled a diversity of research studies focused on the current policy environment of high stakes accountability and how this context has impacted educators and students at multiple levels of the system This effort to leverage student performance through high stakes reform has accelerated and intensified considerably since the 2002 reauthorization of the federal Elementary and Secondary Education Act commonly referred to as No Child Left Behind NCLB In order for high stakes accountability reforms to realize their stated aims targeted schools must have or acquire the resources and capacity to meet prescribed performance standards Hess 1999 Malen Mintrop 2003 2004 Wong et al 1999 yet little systematic research has been assembled to document the implications of high stakes accountability systems on the resources and capacity of schools and school systems This book aims to fill that gap With this in mind authors were asked to pay specific attention to challenges school systems confront as a result of NCLB and other high stakes reforms The contributing authors were asked to think of policymakers and practitioners at local state and national levels as the intended audiences for their work Our contributors responded with a collection of studies examining the relationship between high stakes reform and school district staffing the recruitment and distribution of high quality teachers curriculum making and the provision of supplemental educational services to children Our book is organized into three sections The first provides a framework for assessing the impact of high stakes accountability policy on school capacity and also addresses implementation challenges at both state and local levels The second section focuses on the impact of federal and state policymaking on teacher staffing and workplace conditions The final section includes three chapters that provide a range of critiques on federal policymaking including legal challenges to NCLB
