Abstract Bulletin of the Institute of Paper Chemistry, 1974 **Bulletin of the Institute of Paper Chemistry** Institute of Paper Chemistry (Appleton, Wis.), 1954 *Abstract Bulletin of the Institute of Paper Chemistry* Institute of Paper Chemistry (Appleton, Wis.), 1959 **From Medical Chemistry to Biochemistry** Robert E. Kohler, 1982-05-31 This penetrating case study of institution building and entrepreneurship in science shows how a minor medical speciality evolved into a large and powerful academic discipline Drawing extensively on little used archival sources the author analyses in detail how biomedical science became a central part of medical training and practice The book shows how biochemistry was defined as a distinct discipline by the programmatic vision of individual biochemists and of patrons and competitors in related disciplines It shows how discipline builders used research programmes as strategies that they adapted to the opportunities offered by changing educational markets and national medical reform movements in the United States Britain and Germany The author argues that the priorities and styles of various departments and schools of biochemistry reflect systematic social relationships between that discipline and biology chemistry and medicine Science is shaped by its service roles in particular local contexts This is the central theme The author's view of the political economy of modern science will be of interest to historians and social scientists scientific and medical practitioners and anyone interested in the ecology of knowledge in scientific institutions and professions **Chemistry and Industry**, 2007 Colorimetry Deane Brewster Judd, 1950 The judgment of color permeates our industrial life The farmer finds his vegetables and fruits often graded and priced according to color Raw wool cotton and silk are graded and priced according to color Only in this way can the textile manufacturer produce goods of uniform color at a price low enough to sell Oils and resins used for paint have their colors measured with extreme care and pigments and dyes likewise Poor quality edible oils cottonseed coconut olive peanut can often be detected by color and light colored cooking oils bring a premium price apart from quality because bakers know they can sell the resulting light colored cakes and pies without any trouble Color measurement is especially vital in mass production The assembly of parts from different sources to make a complicated machine like a refrigerator often requires a color specification for each of several parts The white plastic door to the freezing unit must be related in color to the interior walls of the refrigerator by color tolerances no less important to the final sale than are the length and width tolerances that insure the fit of the door There is scarcely a segment of industry untouched by color considerations Precise judgment of color is made possible by color measurement or colorimetry During the past two decades the National Bureau of Standards has played a leading part in establishing practical working standards of color and in setting up and administering color tolerances These standards and methods have been described in some scores of scientific and technical publications It is the purpose of this Circular to bring together this information in concise form and by giving the basis for each technique to show more clearly how they supplement each other than has been possible in the several separate descriptions of them now

available It is hoped that this information will still further facilitate the purchase and sale of commodities and manufactured goods on a fair basis Conformity to a color requirement can now be determined with the same assurance as size shape or strength Preface *The Edinburgh University Calendar* University of Edinburgh,1959 **The Journal of the Engineering Institute of Canada** Engineering Institute of Canada,1920 *Partners in Science* Robert E. Kohler,2020-02-22 Robert Kohler shows exactly how entrepreneurial academic scientists became intimate partners in science with the officers of the large foundations created by John D Rockefeller and Andrew Carnegie and in so doing tells a fascinating story of how the modern system of grant getting and grant giving evolved and how this funding process has changed the way laboratory scientists make their careers and do their work This book is a rich historical tapestry of people institutions and scientific ideas It will stand for a long time as a source of precise and detailed information about an important aspect of the scientific enterprise It also contains many valuable lessons for the coming years John Ziman Times Higher Education Supplement
