Preparing Teachers to Teach with Technology Charalambos Vrasidas, Gene V Glass, 2005-06-01 Teacher preparation programs in the United States and around the world have finally begun to address this deficiency in their programs. The realization that technology is a powerful driving force in education coupled with a renewed emphasis on teacher preparation by governments have resulted in some dramatic changes in teacher preparation programs. I believe that we have just begun to see changes in teacher preparation and that the pace of change will continue to accelerate. This volume covers some of the more exciting developments in the field including the emergence of wireless computing in the classroom and the preparation of teachers in an online environment. In short, I am optimistic. For those of you who are also in the field, I think you will agree. For those who are just entering the field, this book is a great place to start as you change education. Finally, while this book is the last book of the three-part series that we at CAIT conceptualized with Charalambos Vrasidas and Gene Glass, it is also the beginning of a new relationship. We are excited to join with a new partner, CARDET, to present this book. Over many years in the education and R D field, I have come to realize the value of partnerships and relationships. I want to thank both Charalambos and Gene for making this series a reality and such a success. We are looking forward to working with them and CARDET in the near future.

Differentiated Assessment for Middle and High School Classrooms Deborah Blaz, 2013-10-31. This book shows middle and high school teachers in differentiated classrooms how to integrate assessment into the teaching and learning process. With examples from real classrooms, this book demonstrates how to use a wide variety of assessment to better address the needs of your students with regard to their learning style, level of cognitive ability, skill level, interests, etc. Included are detailed examples of both formative and summative assessments.

Teaching and Using Document-Based Questions for Middle School Edward P.

O'Connor, 2003-11-14. This guide focuses on using Document Based Questions (DBQs) to challenge students to interpret primary sources such as letters, diaries, speeches, and other historical records. Challenge your students to interpret primary sources from American History such as letters, diaries, speeches, and other historical records. Students learn to analyze a wide variety of visual and graphic stimuli such as paintings, photographs, charts, and graphs using Document Based Questions. Containing sixteen different themes selected from major units that are covered in American History, DBQs help to utilize many of the skills stressed by social studies teachers and are an excellent tool for assessing student progress. The activities are geared primarily toward middle school students, grades 6-8, but can be adapted easily for use by secondary students.
