Researchers recently announced the earth could actually with stand up to 200,000 times the current population. They arrived at this figure by calculating the amount of heat a human body emits, and only at 1.3 million billion would the earth be too hot to be habitable. And though it would feel like being in a can of sardines if that figure were ever reached, the earth is capable of comfortably sustaining a population several times the current 6.5 billion.

In fact, fertility is actually on the decline worldwide. Though population has grown, the rate of growth has fallen sharply. Twenty years ago, the UN projected that population would reach 11.16 billion in 2050, today they say it will reach only 9.37 billion. Moreover, human population will stabilize at about 11.5 billion. While this figure is almost twice the current one, it is hardly claustrophobic.

True, the demands on resources are heavy even now, but this is more due to the manner in which these resources are being used. In fact, figure show that a bigger population does not amount to greater consumption. Over 20% of the world's people in the highest-income countries account for 86% of total private consumption expenditure expenditure-the poorest 20% a tiny 1.3% with just 5% of the world's population, the US consumes about 40 % of the world's resources. Would you say the US is overpopulated ?

Concerns on scarcity of food are equally baseless. In fact, global food production has actually kept up with population growth.

Non-Native English-Speaking Teachers Revisited Xuan Zheng, 2025-03-31 Drawing on ethnographical evidence, this book examines the complexity of the controversial construct Non-Native English-Speaking Teacher (NNEST) and the newly proposed translingual/translanguaging teacher in re-scripting their identities. Zheng examines the process of international graduate students learning to become composition teachers and English professionals in the United States. The book addresses the danger of either constructing fixed boundaries or dissolving them and helps readers to understand the duality of fixity and fluidity in identity development. Zheng advocates for open dialogue between different ideologies in approaching language diversity in schools with the same aim of social justice. This volume will attract academic readers from a range of disciplines and in different contexts: trainers of international teaching assistants, composition, second language writing scholars, and present or future professionals in TESOL, second foreign language teaching.

Prosodic Theory and Practice Jonathan Barnes, Stefanie Shattuck-Hufnagel, 2022-02-08 An introduction to the range of current theoretical approaches to the prosody of spoken utterances with practical applications of those theories. Prosody is an extremely dynamic field with a rapid pace of theoretical development and a steady expansion of its influence beyond linguistics into such areas as cognitive psychology, neuroscience, computer science, speech technology, and even the medical profession. This book provides a set of concise and accessible introductions to each major theoretical approach to prosody, describing its structure and implementation and its central goals and assumptions, as well as its strengths and weaknesses. Most surveys of basic questions in prosody are written from the perspective of a single theoretical framework. This volume offers the only summary of the full range of current theoretical approaches with practical applications of each theory and critical commentary on selected chapters. The current abundance of theoretical approaches has sometimes led to apparent conflicts that may stem more from terminological differences or from differing notions of what theories of prosody are meant to achieve than from actual conceptual disagreement. This volume confronts this pervasive problem head-on by having each chapter address a common set of questions on phonology, meaning, phonetics, typology, psychological status, and transcription. Commentary is added as counterpoint to some chapters with responses by the chapter
