Schmallegger, 2003-02 **The Evolutionary Foundations of Economics** Kurt Dopfer, 2005-05-23 It is widely recognised that mainstream economics has failed to translate micro consistently into macro economics and to provide endogenous explanations for the continual changes in the economic system Since the early 1980s a growing number of economists have been trying to provide answers to these two key questions by applying an evolutionary approach This new departure has yielded a rich literature with enormous variety but the unifying principles connecting the various ideas and views presented are as yet not apparent This 2005 volume brings together fifteen original articles from scholars each of whom has made a significant contribution to the field in their common effort to reconstruct economics as an evolutionary science Using meso economics as an analytical entity to bridge micro and macro economics as well as static and dynamic realms a unified economic theory emerges

Schindewolf, 1993 Now available in English for the first time Basic Questions in Paleontology is a landmark work in twentieth century evolution and paleontology Originally published in German in 1950 Schindewolf s book was highly controversial for its thoroughgoing anti Darwinism but today his ideas are remarkably relevant to current research in evolutionary biology This book would rank number one on my list of items awaiting translation from the history of twentieth century evolutionary theory Stephen Jay Gould **How Things Shape the Mind** Lambros Malafouris, 2016-02-12 An account of the different ways in which things have become cognitive extensions of the human body from prehistory to the present An increasingly influential school of thought in cognitive science views the mind as embodied extended and distributed rather than brain bound or all in the head This shift in perspective raises important questions about the relationship between cognition and material culture posing major challenges for philosophy cognitive science archaeology and anthropology In How Things Shape the Mind Lambros Malafouris proposes a cross disciplinary

analytical framework for investigating the ways in which things have become cognitive extensions of the human body Using a variety of examples and case studies he considers how those ways might have changed from earliest prehistory to the present Malafouris s Material Engagement Theory definitively adds materiality the world of things artifacts and material signs into the cognitive equation His account not only questions conventional intuitions about the boundaries and location of the human mind but also suggests that we rethink classical archaeological assumptions about human cognitive evolution
