

Section 5-3 Human Population Growth (pages 129-132)

This section describes how the size of the human population has changed over time. It also explains why population growth rates differ in countries throughout the world.

Historical Overview (page 129)

1. How does the size of the human population change with time? It tends to increase with time.
2. Why did the population grow slowly for most of human existence? Life was harsh, and limiting factors kept population sizes low.
3. Circle the letter of each reason why the human population began to grow more rapidly about 500 years ago.
 - ☒ a. Improved sanitation and health care reduced the death rate.
 - ☒ b. Industry made life easier and safer.
 - ☒ c. The world's food supply became more reliable.
 - ☐ d. Birthrates in most places remained low.

Patterns of Population Growth (pages 130-131)

4. Why can't the human population keep growing exponentially forever? Earth and its resources are limited.
5. What is demography? It is the scientific study of human populations.
6. What factors help predict why the populations of some countries grow faster than others? Factors include birthrates, death rates, and the age structure of the populations.
7. The hypothesis that explains why population growth has slowed dramatically in the United States, Japan, and much of Europe is called the demographic transition.
8. Throughout much of human history, what have been the levels of birthrates and death rates in human societies? Human societies have had high birthrates and equally high death rates.
9. What factors lower the death rate? Advances in nutrition, sanitation, and medicine lower the death rate.

The Political Economy of Economic Growth in Africa, 1960-2000: Volume 1 Benno J. Ndulu,Stephen A. O'Connell,Robert H. Bates,Paul Collier,Chukwuma C. Soludo,2009-04-30 The period from 1960 to 2000 was one of remarkable growth and transformation in the world economy Why did most of Sub Saharan Africa fail to develop over this period Why did a few small African economies succeed spectacularly The Political Economy of Economic Growth in Africa 1960 2000 is by far the most ambitious and comprehensive assessment of Africa s post independence economic performance

to date Volume 1 examines the impact of resource wealth and geographical remoteness on Africa's growth and develops a new dataset of governance regimes covering all of Sub-Saharan Africa. Separate chapters analyze the dominant patterns of governance observed over the period and their impact on growth, the ideological formation of the political elite, the roots of political violence and reform, and the lessons of the 1960-2000 period for contemporary growth strategy. *Irm-Soc* Brym, Lie, 2004-03 *Conflict and Change in Australia's Peri-Urban Landscapes* Melissa Kennedy, Andrew Butt, Marco Amati, 2016-03-22 In an era of rapid urbanization, peri-urban areas are emerging as the fastest growing regions in many countries. Generally considered as the space extending one hundred kilometres from the city fringe, peri-urban areas are contested and subject to a wide range of uses such as residential development, productive farming, water catchments, forestry, mineral and stone extraction, and tourism and recreation. Whilst the peri-urban space is valued for offering a unique ambience and lifestyle, it is often highly vulnerable to bushfire and loss of biodiversity and vegetation, along with threats to farming and food security in highly productive areas. Drawing together leading researchers and practitioners, this volume provides an interdisciplinary contribution to our knowledge and understanding of how peri-urban areas are being shaped in Australia through a focus on four overarching themes: Peri-urban Conceptualizations, Governance and Planning, Land Use and Food Production and Solutions, and Representations. Whilst the case studies focus on Australia, they advance a variety of tools useful in discerning processes and impacts of peri-urban change globally. Furthermore, the findings are instructive of the issues and tensions commonly encountered in rapidly urbanizing peri-urban areas throughout the world, from landscape valuation and biosecurity concerns to functional adaptation and social change.
