Addison-Wesley Introduction to Physical Science Michael B. Leyden, 1988 **Doing Science (RLE Edu O)** Robin Millar, 2012-05-31 Doing Science is unique in seeking to make explicit the links between science education and science studies. These fields of study and their respective academic communities whilst appearing to have many potential points of contact remain surprisingly separate with little apparent recognition of the relevance to the interests of each of the work done within the other tradition. Presenting detailed accounts of current research, the book highlights the significance of modern science studies for classroom practice and conversely the importance of the classroom and teaching laboratory as a context for science studies. The thread which runs through the collection as a whole is children's experience of doing science and the image of science which learners pick up along with the science knowledge, understanding and skills they require.

Glencoe Earth Science Ralph M. Feather, 1999 Earth science is the study of Earth and space. It is the study of such things as the transfer of energy in Earth's atmosphere, the evolution of landforms, patterns of change that cause weather, the scale and structure of stars and the interactions that occur among the water, atmosphere and land. Earth science in this book is divided into four specific areas of study: geology, meteorology, astronomy and oceanography. p 89 Routledge Library Editions: Education Mini-Set O Teaching and Learning 14 vols Various, 2021-12-02 Originally published between 1973 and 1993, the 14 books in this set discuss a number of themes such as policy, practice and evaluation in schools dealing with disruptive behaviour, issues regarding the teaching of arts and sciences, ethnographic studies of life in primary and secondary schools and critical events in teaching and learning. **MSCEIS 2019** Lala Septem Riza, Eka Cahya Prima, Toni
