established name in recognition of a change in usage which has come about over the years Supervisor is now more generally used in industry for the first level of management and is especially appropriate since the emerging role of women in supervisory and higher positions has rendered the earlier gender specific term less properly descriptive Moreover although the orientation of the book is to manufacturing operations the principles and techniques discussed have wide application in office operations where the term supervisor is the designation universally used To retain continuity with the previous editions the compromise term foreman supervisor was adopted As in previous editions each chapter is written by an authority in the subject covered Each moreover stands on its own feet i e it can be read as a separate article independent of preceding or succeeding chapters
