Selected Writings Of Rahn 1965 2014:

Selected Writings of Rahn - 1965 - 2014 Ronald J. Graham, 2014-12 This book contains a half century of Rahn's journey toward truth and an authentic well lived life Get to know him and his unique well considered life Religion Philosophy Politics Healthy body mind Humorous writings which contain truth Get it all in this one book *Science without Leisure* Harun Küçük, 2019-12-13 Science in seventeenth and eighteenth century Istanbul Harun K k argues was without leisure a phenomenon spurred by the hyperinflation a century earlier when scientific texts all but disappeared from the college curriculum and inflation reduced the wages of professors to one tenth of what they were in the sixteenth century It was during this tumultuous period that philosophy and theory the more leisurely aspects of naturalism and the pursuit of knowledge for knowledge's sake vanished altogether from the city But rather than put an end to science in Istanbul this economic crisis was transformative turning science into a practical matter into something one learned through apprenticeship and provided as a service In *Science without Leisure* K k reveals how Ottoman science when measured against familiar narratives of the Scientific Revolution was remarkably far less scholastic and philosophical and far more cosmopolitan and practical His book explains why as practical naturalists deployed natural knowledge to lucrative ends without regard for scientific theories science in the Ottoman Empire over the long term ultimately became the domain of physicians bureaucrats and engineers rather than of scholars and philosophers **Physiology in Medicine: From Rest to Exercise** Johannes Van Lieshout, James P. Fisher, 2022-10-05 **Being Spiritual but Not Religious** William B. Parsons, 2018-05-30 In its most general sense the term Spiritual but Not Religious denotes those who on the one hand are disillusioned with traditional institutional religion and on the other hand feel that those same traditions contain deep wisdom about the human condition This edited collection speaks to what national surveys agree is a growing social phenomenon referred to as the Spiritual but Not Religious Movement SBNRM Each essay of the volume engages the past present and future's of the SBNRM Their collective contribution is analytic descriptive and prescriptive taking stock of not only the various analyses of the SBNRM to date but also the establishment of a new ground upon which the continued academic discussion can take place This volume is a watershed in the growing academic and public interest in the SBNRM As such it will vital reading for any academic involved in Religious Studies Spirituality and Sociology **Conceptions of Dreaming from Homer to 1800** G. W. Pigman III, 2019-01-31 *Conceptions of Dreaming from Homer to 1800* traces the history of ideas about dreaming during the period when the admonitory dream was the main focus of learned interest from the Homeric epics through the Renaissance and the period when it began to become a secondary focus the eighteenth century The book also considers the two most important dream theorists at the turn of the twentieth century Sigmund Freud and Sante de Sanctis While Freud is concerned with questions of what a dream means and how to interpret it de Sanctis offers a synthesis of nineteenth century research into what a dream is and represents the Enlightenment transition from particular facts to

general laws **Xenophon's Peloponnesian War** Aggelos Kapellos, 2019-09-23 The advances in Xenophonic studies of the last generation have still not resulted in a definitive literary treatment of the Hellenica 1 2 so Xenophon's description of the Peloponnesian War deserves closer examination This book aims to show that Xenophon has crafted his narrative in such a way as to reinforce the opinion of Thucydides whose work he continued that the development of the Peloponnesian War depended to a great extent on Persian money but the factors that ultimately determined its outcome were the moral virtues and the skills of the military leaders of Athens and Sparta Regarding Athens Xenophon wants to show that despite Persia's support of Sparta Athens lost the war because of its troubled relationship with Alcibiades the moral disintegration of the Athenians who condemned illegally the Arginousai generals and the appointment of generals who were greatly inferior Concerning Sparta Xenophon leads his readers to believe that in spite of not because of the interference of Persia in the Peloponnesian War the moral and military qualities of Lysander and Callicratidas were what turned the course of the war either in favor of or against Sparta in each phase of the war Pillaging the Empire Kris E Lane, Kris Lane, Robert M. Levine, 2015-07-24 Between 1500 and 1750 European expansion and global interaction produced vast wealth As goods traveled by ship along new global trade routes piracy also flourished on the world's seas Pillaging the Empire tells the fascinating story of maritime predation in this period including the perspectives of both pirates and their victims Brushing aside the romantic legends of piracy Kris Lane pays careful attention to the varied circumstances and motives that led to the rise of this bloodthirsty pursuit of riches and places the history of piracy in the context of early modern empire building This second edition of Pillaging the Empire has been revised and expanded to incorporate the latest scholarship on piracy maritime law and early modern state formation With a new chapter on piracy in East and Southeast Asia Lane considers piracy as a global phenomenon Filled with colorful details and stories of individual pirates from Francis Drake to the women pirates Ann Bonny and Mary Read this engaging narrative will be of interest to all those studying the history of Latin America the Atlantic world and the global empires of the early modern era **The Quest for Symbolic Communication in Non-Human Animals** Ulrike Griebel, D. Kimbrough Oller, Irene M. Pepperberg, 2024-06-13 Human language is unique among animals We assume that complex cognitive capacities in general and language in particular evolved gradually and thus are manifest in different kinds and/or degrees in other animals demonstrating social communication This assumption is supported by the fact that we can train social species from very different groups of animals e.g. great apes dolphins dogs parrots to understand and in several cases even use abstract symbols for communication with humans and conspecifics Even simple grammatical rules for sequences of 2-3 symbols can be trained to be understood by several species e.g. great apes dogs dolphins Even though human language training in these species takes considerable time and effort it convinces us that cognitive foundations for language are present in other species and given the relevant selection pressures symbolic communication could evolve in other species *The British Library General Catalogue of Printed Books 1976 to 1982* British

A Collection of (Mostly) Rather Eccentric Commentaries and The Night the Tet Offensive Began John Hester, 2014-09-09 This book is a collection of some of the commentaries he wrote in his editorial page column over the years Most of his commentaries were about local matters of specific interest to the community in which the newspaper was located but all of these are of a more universal scope

Intracellular biomineralization in bacteria Damien Faivre, 2014-11-14 Bacteria can sequester metals and other ions intracellularly in various forms ranging from poorly ordered deposits to well ordered mineral crystals Magnetotactic bacteria provide one example of such intracellular deposits They synthesize intracellular magnetic minerals of magnetite Fe_3O_4 and or greigite Fe_3S_4 magnetosomes which are generally less than 150 nm and organized into one or multiple chain structures The magnetosome chain s act like a compass needle to facilitate the navigation of magnetotactic bacteria by using the Earth s magnetic field Due to their ubiquitous distribution in aquatic and sedimentary environments magnetotactic bacteria play important roles in global iron cycling Other intracellular mineral phases have been evidenced in bacteria such as As_2S_3 CaCO_3 CdS Se_0 or various metal phosphates which may play as well a significant role in the geochemical cycle of these elements However in contrast to magnetotactic bacteria the biological and environmental function of these particles remains a matter of debate In recent years such intracellularly biomineralizing bacteria have

become an attractive model system for investigating the molecular mechanisms of organelle like structure formation in prokaryotic cells The geological significance of intracellular biomineralization is important spectacular examples are fossil magnetosomes that may significantly contribute to the bulk magnetization of sediments and act as potential archives of paleoenvironmental changes In addition intracellular mineral deposits formed by bacteria have potentially versatile applications in biotechnological and biomedical fields After more than four decades of research the knowledge on intracellularly biomineralizing bacteria has greatly improved The aim of this Research Topic is to highlight recent advances in our understanding of intracellular biomineralization by bacteria Magnetotactic bacteria are a system of choice for that topic but other intracellularly biomineralizing bacteria may bring a unique perspective on that process Research papers reviews perspectives and opinion papers on i the diversity and ecology of intracellularly biomineralizing bacteria ii the molecular mechanisms of intracellular biomineralization iii the chemo and magneto taxis behaviors of magnetotactic bacteria iv the involvement of intracellularly biomineralizing bacteria in local or global biogeochemical cycling v the paleoenvironmental reconstructions and paleomagnetic signals based on fossil magnetosomes vi and the applications of intracellular minerals in biomaterial and biotechnology were welcomed
