

Self-Evaluation/Reflection Paper

This self-evaluation/reflection paper will give me the opportunity to assess my learning throughout the course of Foundations of Educational Technology and the next steps I will take in the learning process.

I began learning in this course by reviewing the materials, researching related topics and ultimately demonstrating the knowledge obtained in an applied way. To me this was the implication of the educational technology competencies; to provide the student with direction, insight, and examples and then to let the student learn by doing. This competency based and very structured approach to learning was very effective in my case and I truly believe that this approach helped me to gain every competency described.

I have found that Educational Technology and its domains are vast and ever changing. The learning platform and online resources in this course provided exciting new prospects for the field of education. As an educator I can now take advantage of these resources by planning, designing and utilizing these resources in effective ways that will communicate the relative advantage to others.

In this course I was able to explore the Blackboard platform and create my own homepage on it using HTML. It was my first attempt with either of these mediums, which I found very enlightening, beneficial and intriguing. It was an interesting experience that led to more independent learning about HTML and Blackboard. I now plan on incorporating Blackboard into my on ground courses.

I was also exposed to FTP and the tiger server by uploading material for my own page on the WWW. This was also a new experience that helped me overcome my long-standing apprehension at doing so. Exploring a WYSIWYG program for the planning, development and building of this web page was also challenging and very rewarding. I have now found myself advising my students to do the same.

Working in a group online was facilitated a lot more smoothly than I had anticipated. I found my group helpful dependable and very constructive. We were able to find an educational site, develop criteria, and produce an understandable evaluation based on our group consensus. I have now become more critical when analyzing information online. I found that there is a lot of information out there, some dependable and some not. Most importantly, well-developed content and presentation go a long way in effective communication of educational goals. Because of this experience, I will welcome any group projects that I may be assigned in the future.
