Media Literacy and Media Education Research Methods Pierre Fastrez, Normand Landry, 2023-11-27 This handbook interrogates the foundations of media literacy and media education research from a methodological standpoint. It provides a detailed illustrated overview of key methods used in the study of media literacy and media education. It explores key topics including screen experiences and the manifestation of prosocial and antisocial behaviour, advertising and the development of consumerism, and the evidence of screen time on a child's health and school performance. Gunter insightfully assesses television content that children are exposed to and its impact on cognitive and behavioural development. Featuring commentary on the challenges regulators face to keep up with rapidly developing screen technologies and suggestions on how parents can mediate their children's screen behaviour, this text is an essential read for researchers and students taking courses in child development, family studies, broadcasting and communication.
