4 pages | 851 words

This essay gives me an opportunity to understand the skills, knowledge and competencies required of a professional nurse as well as, help me to do a self-assessment of my strengths and weaknesses and how to build on it. It will also help me plan my career as a professional nurse. The essay will expose me to a wide range of career opportunities within the nursing profession so that I can develop plans and scenarios in order to fit an ever-changing world.

Nursing is a rewarding and fulfilling career and a profession which is broad. Nurses collaborate with doctors and other multidisciplinary teams to restore, bring back to life and alleviate pain of a patient. Nurses play a wide range of roles in the health delivery system. These roles include health promotion, providing dignity and privacy, enforcing confidentiality, respecting patients' views and beliefs. By acting as teachers, a nurse promotes self-care, good exercise and healthy life among others. Nurses are good communicators, listeners, and maintain good moral and rapport at all times. As advocates for patients, nurses are with people during critical times of their lives, birth, injury, illness or death. Having shared their most intimate details of their lives, nurses become advocates through supporting the patients, speaking on their behalf and interceding when necessary.

Nursing requires certain core knowledge and skills. These skills and knowledge are central to the performance of my duty as a professional nurse. As a professional nurse, I'm expected to demonstrate a good patient observation and care skills, professional skills, awareness and practice of health and safety standard, infections prevention and control, communication skills, medical administration, protection of the vulnerable individuals among others.

As part of patient observation and care, I'm expected to demonstrate and undertake skills which include plan and record care, prepare for patient discharge, chronic and acute pain assessment; measuring pulse, recognising rate, rhythm and strength, assisting with bath/shower, oral hygiene and toilet needs among others.

Among the professional skills as I'm expected to demonstrate and practice are the following: evaluate care, time management, solve problems, prepare self and others for emotionally challenging situations as well as preparing individuals emotionally for procedures. I am expected to promote the independence, the human rights and maintain privacy and dignity of the individual.

As a professional nurse I'm expected to provide care in a warm, sensitive and compassionate manner. Break bad news to a patient/carer, act professionally and appropriately in situations where there are limits to confidentiality, and use appropriate strategies to enable patients to understand treatments and other interventions in order to give informed consent where applicable.

I have worked in a nursing home and as a result, I have acquired care skills such as assisting patients with shower, oral hygiene needs, use of hoist, infection and prevention control, health and safety, and communication. I have the ability to work as a team player.

Caring for the elderly in the past made me develop an interest in adult nursing. I have developed empathy and sympathy towards patients and my entire family as a whole. I have understood and respect other people's views, values and beliefs. The holistic care and...

Midwifery & Childbirth J. Pence, Childbirth is both a profound experience and a contested subject The experience of women has complex medical historical cultural and public policy dimensions In this book Judith Rooks achieves the rare feat of bringing these dimensions together in a way that can be appreciated by health care planners midwives physicians and women considering pregnancy The author vividly describes the history of struggle among health care providers over the meaning and handling of the birth process The medical model and the midwifery model continue to collide today the former focusing on pathology and monitoring the patient for it the latter focusing on birth as a normal healthy process The education and professional training of those who care for women during pregnancy childbirth and the important postpartum period reflects these divisions Obstetrics family physicians midwives nurses and others play roles in providing the necessary care In focusing on midwives Rooks deals fairly and sensitively between certified nurse midwives and direct entry midwives most of whom lack formal educational preparation in midwifery This book describes clearly and with documented scientific evidence the specific benefits of the midwifery approach to the care of pregnant women and their families In clear language accessible to the lay reader Rooks summarizes the research on the unintended effects of obstetrical interventions such as episiotomies

epidurals C sections and continuous electronic fetal heart monitoring and the effectiveness and important benefits of an approach that focuses on the positive potential of childbearing as contrasted with a narrow focus of potential for pathology While she acknowledges the importance of access to medical care extensive research shows the advantages of the midwifery approach Much that passes for routine obstetric care in the United States has been found to be unnecessary ineffective or even harmful when applied to women with normal pregnancies The arguments over the control of childbirth are set in the context of recent changes in health care including the current transition to managed care the impact of the women s movement and movements for natural childbirth home birth and breastfeeding and women s fear of and concern about the pain associated with labor Rooks also explains the influence of the reports and recommendations of prestigious scientific and health policy commissions and of federal initiatives and programs on the care provided to pregnant women in this country She contrasts U S practices with those of comparable industrialized countries like the European states Canada Australia New Zealand and Japan

Resources in Education ,1993 **Expert Clinician to Novice Nurse Educator** Jeanne Merkle Sorrell,Pamela Cangelosi,Pamela Rubel Cangelosi,2015-08-24 Research shows that the sharing of personal first hand stories not only enhances learning and eases the transition to a new role but also helps novice educators to understand that their challenges are shared by others With the goal of improving the experience of nurses transitioning from clinician to educator in hospitals as well as schools of nursing this unique book presents the stories of nurses who made this transition It presents the findings of several qualitative studies addressing the question What is the lived experience of clinicians as they assume new roles as clinical nurse educators These narratives describe the challenges they faced and transformations in each nurse s identity and relationships during the transition process The text includes recommendations from the Carnegie Foundation for the Advancement of Teaching and specific problem solving strategies that have worked for others The narratives are from nurse clinicians nurse educators and students who provide insights into such common dilemmas faced by novice educators as How do I keep a patient safe while allowing the student nurse to practice a skill for the first time If a student is slow to catch on to a procedure how long do I wait before they fail How do I help provide a safe and effective learning environment for new graduate nurses The book includes stories of students who describe caring and uncaring experiences with clinical nurse educators Stories address cultural diversity bullying and dilemmas related to critical and ethical thinking Nurse educators themselves share insights into what they wish they had done differently to guide students and new graduate nurses in their learning While these storytellers had diverse clinical and educational backgrounds there were consistent similarities between the experiences they described One common thread was the need to embrace the role of a novice in order to succeed The book will serve as a valuable text for graduate students in nurse educator courses as well as students and nurses seeking support insight and inspiration in their transition to the clinical nurse educator role

Key Features Presents experiential narratives from nurses who made the transition from clinician to educator Describes important aspects of a nurse s transition

from the role of clinical expert to that of novice educator Includes research based insights in a highly accessible style and format Integrates National League for Nursing Core Competencies into the text Provides inspiring helpful and comforting guidance for nurse clinicians feeling lost or confused in a new role
