

Chapter 9 Physical Science Study Guide:

- Know all vocab (on Quizlet)
- Know/describe the different parts of an atom
- Describe the atomic model timeline
 - Scientists, theories, discoveries, models, experiments
- Know what quarks are
- Know what happens to a neutral atom when the number of protons, neutrons, or electrons change
- Be able to describe the three types of nuclear decay

Different Parts of an Atom:

- **Electrons** are very small particles inside an atom with one negative charge (-1). The closer electrons are to the nucleus, less energy.
- The **nucleus** is a small area in the center of the atom where most of its mass and positive charge is concentrated
- A **proton** is an atomic particle that has one positive charge (+1)
- A **neutron** is a neutral particle that exists in the nucleus of an atom
- An **electron cloud** is an area around an atomic nucleus where an electron is most likely to be located
- A **quark** is the smallest particle in an atom, and it is what protons and neutrons are made of

The Atomic Model Timeline:

DEMOCRITUS:

- He was a philosopher who challenged the popular idea of matter.
- His atomic theories were that atoms are small solid objects that cannot be divided, created, or destroyed. Also, that atoms are constantly moving in empty space, and that different types of matter are made of different types of atoms. His last theory is that the properties of the atoms determine the properties of matter.

DALTON:

- In the late 1700s, John Dalton revisited the idea of atoms.
- His atomic theories were that all matter is made of atoms that can't be divided, created, or destroyed. Also, that during a chemical reaction, atoms of one element can't be converted into atoms of another element. The third theory is that atoms of one element are identical to each other but different from atoms of another element. The last theory is that atoms combine in specific ratios.

Critical Appraisal of Physical Science as a Human Enterprise Mansoor Niaz,2009-02-07 It is generally believed that doing science means accumulating empirical data with no or little reference to the interpretation of the data based on the scientist s th retical framework or presuppositions Holton 1969a has deplored the widely accepted myth experimenticism according to which progress in science is presented as the inexorable result of the pursuit of logically sound conclusions from un biguous experimental data Surprisingly some of the leading scientists themselves Millikan is a good example have contributed to perpetuate the myth with respect to modern science being essentially empirical that is carefully tested experim tal facts free of a priori conceptions leading to inductive generalizations Based on the existing knowledge in a field of research a scientist formulates the guiding assumptions Laudan et al 1988 presuppositions Holton 1978 1998 and hard core Lakatos 1970 of the research program that constitutes the imperative of presuppositions which is not abandoned in the face of anomalous data Laudan and his group consider the following paraphrase of Kant by Lakatos as an important guideline philosophy of science without history of science is empty Starting in the 1960s this historical school

has attempted to redraw and replace the positivist or logical empiricist image of science that dominated for the first half of the twentieth century Among other aspects one that looms large in these studies is that of guiding assumptions and has considerable implications for the main thesis of this monograph Chapter 2 Class 6 Science MCQ (Multiple Choice Questions) Arshad Iqbal, The Class 6 Science Multiple Choice Questions MCQ Quiz with Answers PDF 6th Grade Science MCQ PDF Download Quiz Questions Chapter 1 16 Practice Tests with Answer Key Class 6 Science Questions Bank MCQs Notes includes revision guide for problem solving with hundreds of solved MCQs Class 6 Science MCQ with Answers PDF book covers basic concepts analytical and practical assessment tests Class 6 Science MCQ PDF book helps to practice test questions from exam prep notes The Class 6 Science MCQs with Answers PDF eBook includes revision guide with verbal quantitative and analytical past papers solved MCQs Class 6 Science Multiple Choice Questions and Answers MCQs PDF Free download chapter 1 a book covers solved quiz questions and answers on chapters Air and atmosphere atoms molecules mixtures and compounds cells tissues and organs changing circuits dissolving and soluble forces habitat and food chain how we see things introduction to science living things and environment micro organisms physical quantities and measurements plant growth plant photosynthesis and respiration reversible and irreversible changes sense organ and senses workbook for middle school exam s papers Class 6 Science Quiz Questions and Answers PDF free download eBook s sample covers beginner s solved questions textbook s study notes to practice online tests The book Grade 6 Science MCQs Chapter 1 16 PDF includes middle school question papers to review practice tests for exams Class 6 Science Multiple Choice Questions MCQ with Answers PDF digital edition eBook a study guide with textbook chapters tests for NEET Jobs Entry Level competitive exam 6th Grade Science Mock Tests Chapter 1 16 eBook covers problems solving in self assessment workbook from science textbook and practical eBook chapter wise as Chapter 1 Air and Atmosphere MCQ Chapter 2 Atoms Molecules Mixtures and Compounds MCQ Chapter 3 Cells Tissues and Organs MCQ Chapter 4 Changing Circuits MCQ Chapter 5 Dissolving and Soluble MCQ Chapter 6 Forces MCQ Chapter 7 Habitat and Food Chain MCQ Chapter 8 How We See Things MCQ Chapter 9 Introduction to Science MCQ Chapter 10 Living Things and Environment MCQ Chapter 11 Micro Organisms MCQ Chapter 12 Physical Quantities and Measurements MCQ Chapter 13 Plant Growth MCQ Chapter 14 Plant Photosynthesis and Respiration MCQ Chapter 15 Reversible and Irreversible Changes MCQ Chapter 16 Sense Organ and Senses MCQ The Air and Atmosphere MCQ PDF e Book Chapter 1 practice test to solve MCQ questions on Air and processes air and water atmosphere basic facts composition of air fractional distillation of air gas properties and air and the atmosphere The Atoms Molecules Mixtures and Compounds MCQ PDF e Book Chapter 2 practice test to solve MCQ questions on Atoms and elements class 6 science facts combining elements compounds and properties elements and symbols facts about science interesting science facts metals and non metals metals and non metals mixtures and solutions mixtures separation properties of carbon properties of copper properties of gold properties of nitrogen science facts for kids substance
