

Essential Question:

What was the relative significance of the causes of global conflict from 1900 to the present?

Key Concepts:

Rapid advances in science and technology altered the understanding of the universe and the natural world and led to advances in communication, transportation, industry, agriculture, and medicine.

Peoples and states around the world challenged the existing political and social order in varying ways, leading to unprecedented worldwide conflicts.

The West dominated the global political order at the beginning of the 20th century, but both land-based and maritime empires gave way to new states by the century's end.

The older, land-based Ottoman, Russian, and Qing empires collapsed due to a combination of internal and external factors. These changes in Russia eventually led to communist revolution. States around the world challenged the existing political and social order, including the Mexican Revolution that arose as a result of political crisis.
