Aikhenvald,Robert M. W. Dixon,2006 Two languages can resemble each other in the categories constructions and types of meaning they use and in the forms they employ to express these Such resemblances may be the consequence of universal characteristics of language of chance or coincidence of the borrowing by one language of another s words or of the diffusion of grammatical phonetic and phonological characteristics that takes place when languages come into contact Languages sometimes show likeness because they have borrowed not from each other but from a third language Languages that come from the same ancestor may have similar grammatical categories and meanings expressed by similar forms such languages are said to be genetically affiliated This book considers how and why forms and meanings of different languages at different times may resemble one another Its editors and authors aim a to explain and identify the relationship between areal diffusion and the genetic development of languages and b to discover the means of distinguishing what may cause one language to share the characteristics of another The introduction outlines the issues that underlie these aims introduces the chapters which follow and comments on recurrent conclusions by the contributors The problems are formidable and the pitfalls numerous for example several of the authors draw attention to the inadequacy of the family tree diagram as the main metaphor for language relationship The authors range over Ancient Anatolia Modern Anatolia Australia Amazonia Oceania Southeast and East Asia and Sub Saharan Africa The book includes an archaeologist s view on what

material evidence offers to explain cultural and linguistic change and a general discussion of which kinds of linguistic feature can and cannot be borrowed The chapters are accessibly written and illustrated by twenty maps The book will interest all students of the causes and consequences of language change and evolution     *Resources in Education* ,1994     **Fuzzy Engineering Toward Human Friendly Systems** Toshiro Terano,1992 Comprising papers presented at an international symposium on fuzzy engineering technology this volume provides information on the current state of the art in the field of fuzzy theories and applications and their importance in the areas of industry medicine artificial intelligence management socio economics ecology agriculture behavioural science and education The results of recent research of LIFE Laboratory for International Fuzzy Engineering Research are also included     Educart ICSE Class 10 One-shot Question Bank 2026 Biology (strictly for 2025-26 boards) Sir Tarun Rupani,2025-07-12 Complete Biology revision in one clear concise and exam oriented book This One shot Biology Question Bank by Sir Tarun Rupani is crafted to help ICSE Class 10 students revise the entire Biology syllabus with speed and accuracy With concept clarity labelled diagrams and exam style practice the book follows the official 2025 26 ICSE syllabus strictly Key Features As per Latest ICSE 2025 26 Curriculum Full coverage of chapters including Cell Cycle Genetics Human Anatomy Photosynthesis and more One shot Format Every chapter starts with quick theory notes key definitions concept maps and labelled diagrams for instant recall All ICSE Question Types Included Objective short long answer diagram based reasoning and case based questions Chapterwise PYQs Included Previous year questions from ICSE board papers added for real exam insight Solved in ICSE Answering Style Structured stepwise solutions with proper scientific terminology diagram labelling and formatting Diagrams Terminology Focus Special emphasis on scoring topics like biological processes labelled structures and scientific terms Why Choose This Book This Biology One shot by Sir Tarun Rupani is your complete toolkit for revision and practice built to strengthen concepts and boost answer presentation A smart reliable resource to prepare confidently and score high in the 2026 ICSE Biology board exam     *CUET PG Medical Laboratory Technology Question Bank (2400 MCQs Chapterwise)* Mocktime Publication, CUET PG Medical Laboratory Technology Question Bank 2400 MCQs Chapterwise CUET PG Exam Pattern CUET PG Syllabus CUET PG Previous Papers Books Notes     **Dhaka's Changing Landscape** Rita Afsar,Mahabub Hossain,2019-11-05 Between 1991 and 2010 Dhaka s population more than doubled to 15 million Simultaneously the city s contribution to the national economy almost trebled Clearly population growth was accompanied by an unmistakable trend of economic growth and a significant decline in urban poverty and income inequality On the other hand Dhaka s high population density exacerbated serious environmental challenges and it was soon ranked as one of the world s least livable cities In the context of these contradictory signals of rapid urbanization Dhaka s Changing Landscape sets to answer three most intriguing questions Are the poorer segments of urban population which migrate with dreams for better lives benefitting from positive economic trends Are these benefits sustainable Are these benefits creating scope for this group to have a stake in the city s growing

prosperity By studying 600 households and applying comparative analysis over a span of 20 years the authors examine demographic and economic trends to understand the patterns scale and complexity of urban poverty income inequality and rural urban migration Going beyond the space and poverty debate they enlighten the readers about the quality of life questions sustainability matters and gender and generational roles and relations necessary to understand qualitative transformation and migrants prospects for a better future
