Developing Ambient Intelligence Carsten Rudolph, 2008-04-12 At the time of the introduction of the Ambient Intelligence AmI concept many scenarios were considered to be visionary or even science fiction Enabled by current technology many aspects of these scenarios are slowly but inexorably becoming true However we are still facing important challenges that need further investments in research and industrialization Current software engineering techniques and tools are not prepared to deal with the development of applications for what we could call AmI ecosystems lacking a fixed architecture controlled limits and even owners The comfortable boundaries of static architectures and well defined limits and owners are not existent in these AmI ecosystems In its second year AmI d again shows the heterogeneity of research challenges related to Ambient Intelligence Many disciplines are involved and have to co ordinate their efforts in resolving the strongly related research issues

3rd Symposium of Ubiquitous Computing and Ambient Intelligence 2008 Juan Manuel Corchado Rodríguez, Dante

Tapia, Jose Bravo, 2008-09-16 The Symposium on Ubiquitous Computing and Ambient Intelligence UCAmI began as a workshop held in 2003 in San Sebastian Spain under the Spanish Artificial Intelligence Conference This event gathered 32 attendees and 18 papers were presented The second edition already as a Symposium took place in Granada Spain under the first Spanish Computer Science Conference CEDI Later in 2006 a second workshop was celebrated in Ciudad Real and in 2007 the second Symposium was organized in Zaragoza by the CEDI conference Now we continue to work on the organization of this event in Salamanca a beautiful Spanish city The European Community and the Sixth and Seventh Framework Programs encourage researchers to explore the generic scope of the AmI vision In fact some researchers have a crucial role in this vision Emile Aarts from Philips describes Ambient Intelligence as the integration of technology into our environment so that people can freely and interactively utilize it This idea agrees with the proposal of Mark Weiser regarding the Ubiquitous Computing paradigm
