Winning the Un-war Charles V. Peña, 2007 According to President Bush the American people are safer as a result of invading Iraq True Saddam Hussein has been removed from power But al Qaeda the group that planned and carried out the attacks on September 11 remains at large Meanwhile the White House has conceded that Saddam Hussein had nothing to do with the attacks Charles Peña argues that the war in Iraq is but one misstep in the Bush administration's global war on terror Terrorism is simply a tactic however not an enemy Trying to eradicate it is a quixotic quest that does not focus on those responsible for 9/11 Instead the national security strategy should consist of three central elements establishing homeland security against further attacks dismantling the al Qaeda terrorist network and enacting a foreign policy that does not attract new al Qaeda terrorists This approach requires restructuring U.S. forces and ending Cold War era commitments that distract from the current pressing threat It also requires ameliorating the negative consequences of an interventionist U.S. foreign policy which creates incentives and opportunities for terrorists to target the United States If we misdiagnose al Qaeda's motivations or focus military efforts on the wrong targets then we run the risk that the war against the al Qaeda terrorist threat and the radical Islamic ideology it represents will become a broader war against the Islamic world that could last generations and cost countless lives With a foreword by Michael Scheuer the bestselling author of *Imperial Hubris*

Department of Defense Appropriations United States. Congress. House. Committee on Appropriations. Subcommittee on Department of Defense, 2010

Defense Strategy for the Post-Saddam Era Michael E. O'Hanlon, 2005-09-01 The Brookings Institution has long produced an analysis of America's defense budgets and policies The war on terror and the ongoing operations in Iraq and Afghanistan have forced upon this country soaring defense budgets and unprecedented challenges in policymaking In the newest installment in this tradition leading foreign policy expert Michael O'Hanlon offers policy recommendations for strengthening the ability of America's military to respond to international crises in a tumultuous world The United States can for the foreseeable future be confident that its armed forces will remain engaged in Iraq as well as in Afghanistan and other theaters in the war on terror It will also need to

remain involved in deterrence missions in the western Pacific most notably in Korea and the Taiwan Strait It will wish to remain engaged in European security since the capabilities and cohesion of the NATO alliance have important implications for the United States globally O Hanlon reviews these priorities asking tough questions and developing frameworks for answering them What military will the United States need in the future How much will it cost How can the U S increase the size of its ground forces without increasing the size of the defense budget In an era of apocalyptic terror threats and at a time of 400 billion defense budgets and 400 billion federal budget deficits how can this country protect its citizens while maintaining fiscal responsibility

Analysis of the Army's Transformation Programs and Possible Alternatives

Frances M. Lussier, 2010 The Army has initiated two programs designed to transform itself from a force focused on fighting the Cold War to one better designed to face the challenges of the 21st century Those two programs the Modularity Initiative and the Future Combat Systems FCS program would change the way the Army is organized and equipped respectively This study considers the near and long term implications of those two programs It also examines three alternatives for modernizing the Army's combat forces using modified versions of the FCS program and estimates the costs and savings of those options as well as their effects on the Army's ability to introduce new technologies into its combat brigades An objective impartial analysis Charts and tables

Increasing? Obaid Younossi, 2007 In recent decades there have been numerous attempts to rein in the cost growth of U S Department of Defense DoD acquisition programs Cost growth is the ratio of the cost estimate reported in a program's final Selected Acquisition Report SAR and the cost estimate baseline reported in a prior SAR issued at a particular milestone Drawing on prior RAND research new analyses of completed and ongoing weapon system programs and data drawn from SARs this study addresses the following questions What is the cost growth of DoD weapon systems What has been the trend of cost growth over the past three decades To address the magnitude of cost growth it examines cost growth in completed programs to evaluate the cost growth trend over time it provides additional analysis of a selection of ongoing programs This sample of ongoing programs permits a look at growth trends in the more recent past Changes in the mix of system types over time and dollar weighted analysis were also considered because earlier studies have suggested that cost growth varies by

program type and the cost of the program The findings suggest that development cost growth over the past three decades has remained high and without any significant improvement *Defense Acquisitions: Better Weapon Program Outcomes Require Discipline, Accountability, and Fundamental Changes in the Acquisition Environment* Katherine V. Schinasi, 2009-02 Since 1990 the DoD mgmt of major weapon system acquisitions has been designated a high risk area DoD has taken some action to improve acquisition outcomes but its weapons programs continue to take longer cost more and deliver fewer capabilities than originally planned Over the next 5 years DoD plans to invest about 900 billion to develop and procure weapons systems the highest level of investment in two decades This testimony describes DoD s current weapons system investment portfolio the problems that contribute to cost and schedule increases and the potential impacts of recent legislative initiatives and DoD actions aimed at improving outcomes Charts and tables **Improving Federal Financial Management** United States.
