

Self Assessment Essay

In order for you to measure how successful you are being in preparing yourself for the application to your selected professional program, write a reflective essay (to be given to a member of the Pre-Professional Health Committee for inclusion in your file). The Committee will use these essays to chart your development while at Wagner College, and to construct the best possible letter of evaluation for when you apply to your selected program. It is in your best interest to be honest and critical as you write this essay as it will help you discover both your strengths and weaknesses and guide your future work at Wagner. The reflective essay should answer some, or all, of the following questions and may include other items as well:

Are you taking the required classes for the program?

Are you making satisfactory progress in your major?

Do you enjoy your major?

Do you make an impression on your professors?

Are you learning from your classes, or do you just memorize notes?

Do you review your notes from classes taken before the current semester?

Are you preparing for you professional exam (MCAT, DAT, GRE)?

Have you secured an appropriate work/research experience?

Are you involved in community services?

Are you becoming involved merely to pad your resume?

What roles of leadership have you taken?

Are you developing outside interests?

Have you considered what you will do if you fail to enter your chosen professional program?

Have you researched what professional schools you would like to attend?

Have you started preparing your personal statement?

Once you have completed this essay, please give it to a member of the Pre-Professional Health Committee. Make sure that the essay has your name and date on it.

Academic performance is an unavoidable topic for educational scientists, instructional experts, students, faculty, staff, academic managers, parents, families, and policymakers. While student academic performance is a topic of passionate discussion, it is also interconnected with both faculty, staff, and higher education institutions. Achieving academic success requires more than just the efforts of the student. The teaching profession in higher education increasingly demands measurable results to attest to its efficiency. And the need for the accountability required from higher education institutions tends to influence institutional strategic plans according to tangible and measurable goals. This book will aim to cover the different perspectives of academic performance, placing on the stage the different actors in higher education: students, faculty, and institutions. *35 Must-have Assessment and Record-keeping Forms for Reading*, Laura Robb, 2001. Reading and writing assessment made easy: time-saving teacher-written forms and rubrics to help you know and evaluate the readers and writers in your classroom. *E-Learning Practice in Higher Education: A Mixed-Method Comparative Analysis*, Sayed Hadi Sadeghi, 2017-09-13. This book investigates e-learning practices at American and Australian institutes of higher learning: their status quo, best practice examples, and remaining issues. Utilizing a mixed methods approach, it combines three studies: two using quantitative methods and a third using qualitative methods in order to gauge the status quo of e-learning. The first study addresses the dominant cultural dimensions, revealing that the main explanation for the results may be the fact that most suppliers of the Australian university's e-learning system had an East Asian cultural background and predominantly traditional perspectives on learning. In Study 2, the findings indicate that the levels of e-learning practice at the Australian and US universities surveyed were above average, although the American university was ranked higher in terms of e-learning practices. In turn, Study 3 investigates current problems in e-learning practice on the basis of four aspects: pedagogy, culture, technology, and e-practice, and determines that cultural sensitivity and effective cultural practices show room for improvement, while key technological challenges and issues like faculty policies, quality LMS, and online support need to be overcome. In general, the outcomes suggest that it is essential for the Australian university surveyed to further develop and update its e-learning system, especially in terms of e-practice, using the same technologies that pioneering countries like America are employing. Indeed, the combination of adopting patterns successfully used in other countries and adjusting them to the Australian culture represents the best strategy for educational decision and policy makers. This book provides the basis for designing a culture-sensitive framework for higher education e-learning practice in American and Australian contexts. Moreover, students' and teachers' experiences with e-learning in a comparative higher education context can help higher education instructors and university managers to
