New Jersey Register ,2013 *The Emerald Handbook of Active Learning For Authentic Assessment* Eliseo Vilalta-Perdomo,Alessandra Scroccaro,David Ernesto Salinas-Navarro,Rosario Michel-Villarreal,2025-04-25 Written by teachers for educators and researchers The Emerald Handbook of Active Learning For Authentic Assessment presents a series of insights that teachers may use to conceive design execute and develop active learning experiences for authentic assessment that will enrich students learning experiences From Cancer Patient to Cancer Survivor National Research Council,Institute of Medicine,National Cancer Policy Board,Committee on Cancer Survivorship: Improving Care and Quality of Life,2005-12-01 With the risk of more than one in three getting cancer during a lifetime each of us is likely to experience cancer or know someone who has survived cancer Although some cancer survivors recover with a renewed sense of life and purpose what has often been ignored is the toll taken by cancer and its treatment on health functioning sense of security and well being Long lasting effects of treatment may be apparent shortly after its completion or arise years later The transition from active treatment to post treatment care is critical to long term health From Cancer Patient to Cancer Survivor focuses on survivors of adult cancer during the phase of care that follows primary treatment The book raises awareness of the medical functional and psychosocial consequences of cancer and its treatment It defines quality health care for cancer survivors and identifies strategies to achieve it The book also recommends improvements in the quality of life of cancer survivors through policies that ensure their access to psychosocial services fair employment practices and health insurance This book will be of particular interest to cancer patients and their advocates health care providers and their leadership health insurers employers research sponsors and the public and their elected representatives *Breaking Point* Rebecca Schwartz Greene,2023-01-03 WINNER SOCIETY FOR MILITARY HISTORY DISTINGUISHED BOOK AWARDS FIRST BOOK This book informs the public for the first time about the impact of American psychiatry on soldiers during World War II Breaking Point is the first in depth history of American psychiatry in World War II Drawn from unpublished primary documents oral histories and the author s personal interviews and correspondence over years with key psychiatric and military policymakers it begins with Franklin Roosevelt s endorsement of a universal Selective Service psychiatric examination followed by Army and Navy pre and post induction examinations Ultimately 2 5 million men and women were rejected or discharged from military service on neuropsychiatric grounds Never before or since has the United States engaged in such a program In designing Selective Service Medical Circular No 1 psychiatrist Harry Stack Sullivan assumed psychiatrists could predict who might break down or falter in military service or even in civilian life thereafter While many American and European psychiatrists questioned this belief and huge numbers of American psychiatric casualties soon raised questions about screening s validity psychiatric and military leaders persisted in 1942 and 1943 in endorsing ever tougher screening and little else Soon families complained of fathers and teens being drafted instead of being identified as psychiatric

4Fs and Blacks and Native Americans among others complained of bias A frustrated General George S Patton famously slapped two malingering neuropsychiatric patients in Sicily a sentiment shared by Marshall and Eisenhower though they favored a tamer style Yet psychiatric rejections evacuations and discharges mounted While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943 this was the exception But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself not predisposition precipitated breakdown leading military psychiatrists switched their emphasis from screening to prevention and treatment But this switch was too little too late and slowed by a year long series of Inspector General investigations even while numbers of psychiatric casualties soared Ironically despite and even partly because of psychiatrists wartime performance plus the emotional toll of war postwar America soon witnessed a dramatic growth in numbers popularity and influence of the profession culminating in the National Mental Health Act 1946 But veterans with PTSD not recognized until 1980 were largely neglected
