

he finds reason to suspect his wife of unfaithfulness — he cannot be guided wholly by habit. In proposing marriage he may be guided by mere instinct, or he may be influenced by the belief that the lady is rich. If he is guided by instinct, he no doubt believes that the lady possesses every virtue, and this may seem to him to be a cause of his action, but in fact it is merely another effect of the instinct which alone suffices to account for his action. In choosing a school for his son, he probably proceeds in much the same way as in making difficult business decisions; here belief usually plays an important part. If evidence comes into his possession showing that his wife has been unfaithful, his behaviour is likely to be purely instinctive, but the instinct is set in operation by a belief, which is the first cause of everything that follows.

Thus although beliefs are not directly responsible for more than a small part of our actions, the actions for which they are responsible are among the most important, and largely determine the structure of our lives. In particular, our religious and political actions are associated with beliefs.

(2) The new to you, second question, which is itself twofold: (a) how far are beliefs in fact based upon evidence? (b) how far is it possible to demonstrate that they should be?

money on it. In bankruptcies it often appears that some sentimental factor was the original cause of ruin. Political opinions

are hardly ever based upon evidence, except in the case of civil servants, who are forbidden to give utterance to them. There are

of course exceptions. In the tariff reform controversy which began twenty-five years ago, most manufacturers supported the side that

would increase their own incomes, showing that their opinions were really based on evidence, however little their utterance would have led one to suppose so. We have here a complication. Freudians have accustomed us to 'rationalising', i.e. the process of inventing what seem to ourselves rational grounds for a decision or opinion that is in fact quite irrational. But there is, especially in

Selling Out Howard Woodhouse,2009-09-01 Selling Out demonstrates that the logics of value of the market and of universities are not only different but opposed to one another By introducing the reader to a variety of cases some well known and others not Woodhouse explains how academic freedom and university autonomy are being subordinated to corporate demands and how faculty have attempted to resist this subjugation He argues that the mechanistic discourse of corporate culture has replaced the language of education subject based disciplines and the professors who teach them have become resource units students have become educational consumers and curricula have become program packages Graduates are now products and competing in the global economy has replaced the search for truth *Last Call: Humanity Hanging From A Cross Of Iron And Our Escape To Another Planet* Daniel R Altschuler,2022-05-30 This book tries to look at human thought and action from a scientific perspective and in the process acquaints the reader with essential concepts about science and its history It takes a broad look at our present troubles without overlooking some crucial historical religious and political causes but places science at the center stage The author applies what he has learned throughout his career to go beyond science After an introduction setting the scene and a review of the scientific temper and the inexcusable ignorance of science by some leaders and many followers the author turns his sharp vision to look at other issues The most significant challenges are critical and global climate change caused by our activities stockpiles of nuclear weapons that are a constant threat population growth and increasing inequality at all levels These problems do have a profound ethical character and threaten to end forever with our misery producing a catastrophic convergence Written with rigor for all readers with many references and infused with relevant quotations the author s message is clear we need to change our ways drastically and urgently now or never But he offers not much in terms of a solution something done by many authors to sweeten the pill because as he argues beyond lofty declarations there is no real solution as the clock runs down leading to his dystopian view of the future Words and Things Ernest Gellner,2005 First published in 1959 this classic challenge to the prevailing philosophical orthodoxy of the day remains the most devastating attack on a conventional wisdom in philosophy to this day

Can You Learn to Be Lucky? Karla Starr,2018-08-14 I don t know when I ve been so wowed by a new author Chip Heath co author of The Power of Moments and Switch A talented journalist reveals the hidden patterns behind what we call luck and shows us how we can all improve outcomes despite life s inevitable randomness Do you believe in luck is a polarizing question one you might ask on a first date Some of us believe that we make our own luck Others see inequality everywhere and think that everyone s fate is at the whim of the cosmos Karla Starr has a third answer unlucky random

outcomes have predictable effects on our behavior that often make us act in self defeating ways without even realizing it In this groundbreaking book Starr traces wealth health and happiness back to subconscious neurological processes blind cultural assumptions and tiny details you re in the habit of overlooking Each chapter reveals how we can cultivate personal strengths to overcome life s unlucky patterns For instance Everyone has free access to that magic productivity app motivation The problem It isn t evenly distributed What lucky accidents of history explain patterns behind why certain groups of people are more motivated in some situations than others If you look like an underperforming employee your resume can t override the gut level assumptions that a potential boss will make from your LinkedIn photo How can we make sure that someone s first impression is favorable Just as people use irrelevant traits to make assumptions about your intelligence kindness and trustworthiness we also make inaccurate snap judgments How do these judgments affect our interactions and what should we assume about others to maximize our odds of having lucky encounters We don t always realize when the world s invisible biases work to our advantage or recognize how much of a role we play in our own lack of luck By ending the guessing game about how luck works Starr allows you to improve your fortunes while expending minimal effort
