Advances in our understanding of biology and materials science coupled with the extensive observation of nature have  
stimulated the search for better accommodation compression of materials and the higher organization reduction of  
mechanical stress in man made structures Bio Inspired Materials is a collection of topics that explore frontiers in 3 sections  
of bio inspired design i bionics design ii bio inspired construction and iii bio materials Chapters in each section address the  
most recent advances in our knowledge about the desired and expected relationship between humans and nature and its use  
in bio inspired buildings Readers will also be introduced to new concepts relevant to bionics biomimicry and biomimetics  
Section i presents research concepts based on information gained from the direct observation of nature and its applications  
for human living Section ii is devoted to artificial construction of the Earth This section addresses issues on geopolymers  
materials that resemble the structure of soils and natural rocks procedures that reduce damage caused by earthquakes in
