Heath, Dudley A. Brown, 2025-04-08 This groundbreaking book is a history of the Black Baptist experience in Canada It includes diverse and informative chapters on events themes and organizations such as the underground railway gender architecture literature civil rights empire and associations It also focuses on several key early churches from the West Coast to the East Coast along with important personages such as Washington Christian Jennie Johnson David George William White William Troy and William M Mitchell Material Noise Anne M. Royston, 2019-09-17 An argument that theoretical works can signify through their materiality their noise or such nonsemantic elements as typography as well as their semantic content In Material Noise Anne Royston argues that theoretical works signify through their materiality such nonsemantic elements as typography or color as well as their semantic content Examining works by Jacques Derrida Avital Ronell Georges Bataille and other well known theorists Royston considers their materiality and design which she terms noise as integral to their meaning In other words she reads these theoretical works as complex assemblages just as she would read an artist s book in all its idiosyncratic tangibility Royston explores the formlessness and heterogeneity of the Encyclopedia Da Costa which published works by Bataille Andr Breton and others the use of layout and white space in Derrida's Glas the typographic illegibility static and interference in Ronell's The Telephone Book and the enticing surfaces of Mark C Taylor's Hiding its digital counterpart The R al Las Vegas NV and Shelley Jackson's Skin Royston then extends her analysis to other genres examining two recent artists books that express explicit theoretical concerns Johanna Drucker's Stochastic Poetics and Susan Howe's Tom Tit Tot Throughout Royston develops the concept of artistic arguments which employ signification that exceeds the semantics of a printed text and are not reducible to a series of linear logical propositions Artistic arguments

foreground their materiality and reflect on the media that create them Moreover Royston argues each artistic argument anticipates some aspect of digital thinking speaking directly to such contemporary concerns as hypertext communication theory networks and digital distribution Acquisitions and Collection Development in the Humanities Irene Owens,1997 A guide for the various areas of the humanities including religious studies dance and cultural genres Considers such aspects as managerial concerns in documentary delivery changing budgetary needs and fluctuations in journal prices Also includes a primer on electronic text collection development and an early appearance of the hopefully short lived word Webliography
