

Observation in Theory

Name of Child: Maya

Date: 25/09/2015

Experience: Cutting

DOF: 02/10/2015

Observation

"I want to do cutting, please" Maya asked. "Sure, lets find some paper for you to cut" Lorina replied. "and glue for paper" Maya commented. Maya sat at the table and picked up the scissors with her right hand. She put her thumb through the top hole of the scissors and index and middle finger through the bottom hole. Maya held the paper with her left hand and began cutting with her right. "Paper falling" Maya said. "Hold the paper closer" Lorina commented. Maya began cutting again. She cut a piece from the paper "Yay, I did it, good job" Maya said with a smile. "Glue time" Maya used the glue to stick the pieces of paper she had cut onto the paper, "So, pretty" Maya said.

Interpretation

Through this experience it is evident that Maya manipulates equipment and manages tools (scissors) with increasing competence and skills (3.2.7) - "She put her thumb through the top hole of the scissors and index and middle finger through the bottom hole". Maya celebrates and shares her contributions and achievements with others (1.3.8) - "Yay, I did it, good job" and she follows and extends upon her own interests with enthusiasm, energy and concentration (4.1.4) - "Glue time... Maya used the glue to stick the pieces of paper she had cut onto the paper".

Follow Up

Continue to provide opportunities for Maya to practice and develop her cutting skills. Give her a range of mediums to use for cutting such as newspapers, play-dough, magazines etc.

NBER Macroeconomics Annual 2021 Martin Eichenbaum, Erik Hurst, 2022-05-17 The NBER Macroeconomics Annual 2021 presents research central issues in contemporary macroeconomics Robert Hall and Marianna Kudlyak examine unemployment dynamics during economic recoveries They present new empirical findings and explore models in which the labor market gradually draws down the stock of unemployed workers in the aftermath of a downturn Titan Alon Sena Coskun Matthias Doepke David Koll and Michèle Tertilt analyze the relative decline in employment of women during the COVID 19 pandemic and the associated global recession They show that

increased childcare needs which fell more heavily on women and differences in occupations both contributed. In the case of the US however each of these factors account for less than 20% of the gender gap in hours worked during the pandemic. Richard Rogerson and Johanna Wallenius study the employment rates of older workers in OECD countries over the last forty years. An expansion of institutions incentivizing retirement concurrent with negative aggregate shocks between 1970 and 1995 led to falling employment rates. This trend started to reverse in the mid 1990s when many of these institutions such as public pension programs were cut back. Michael Barnett, William Brock and Lars Peter Hansen explore the consequences of risk ambiguity and model misspecification in climate policy design. They consider carbon emissions pricing and the effects of different sources of uncertainty such as future information about environmental damage, uncertainties in carbon and temperature dynamics and damage functions and the role of future green technologies on policy design. Michael Kremer, Jack Willis and Yang You present new evidence suggesting a steady trend toward income convergence across countries since the late 1980s. They find convergence in various determinants of economic growth across countries and a flattening of the relationship between growth and these determinants. The paper challenges theories of growth arising after earlier rejections of the neoclassical growth model.
