Guided Inquiry Design® in Action Leslie K. Maniotes, 2016-12-05 Edited by the cocreator of the Guided Inquiry Design GID framework as well as an educator speaker and international consultant on the topic this book explains the nuances of GID in the high school context It also addresses background research and explains guided inquiry and the information search process Today's students need to be able to think creatively to solve problems They need to be in learning environments that incorporate collaboration discussion and genuine reflection to acquire these kinds of real world skills Guided Inquiry Design in Action High School gives teachers and librarians lesson plans created within the proven GID framework specifically designed for high school students and provides the supporting information and guidance to use these lesson plans successfully You'll find the lesson plans and complete units of Guided Inquiry Design clear and easy to implement and integrate into your existing curriculum in all areas from science to humanities to social studies These teaching materials are accompanied by explanations of critical subjects such as the GID framework using Guided Inquiry as the basis for personalized learning using inquiry tools for assessment of learning in high school and applying teaching strategies that increase student investment and foster critical thinking and deeper learning Argument-Driven Inquiry in Physical Science

Jonathon Grooms, Patrick J. Enderle, Todd Hutner, Ashley Murphy, Victor Sampson, 2016-10-01 Are you interested in using argument driven inquiry for middle school lab instruction but just aren't sure how to do it Argument Driven Inquiry in Physical Science will provide you with both the information and instructional materials you need to start using this method right away The book is a one stop source of expertise advice and investigations to help physical science students work the way scientists do The book is divided into two basic parts 1 An introduction to the stages of argument driven inquiry from question identification data analysis and argument development and evaluation to double blind peer review and report revision 2 A well organized series of 22 field tested labs designed to be much more authentic for instruction than traditional laboratory activities The labs cover four core ideas in physical science matter motion and forces energy and waves Students dig into important content and learn scientific practices as they figure out everything from how thermal energy works to what could make an action figure jump higher The authors are veteran teachers who know your time constraints so they designed the book with easy to use reproducible student pages teacher notes and checkout questions The labs also support today's standards and will help your students learn the core ideas crosscutting concepts and scientific practices found in the Next Generation Science Standards In addition the authors offer ways for students to develop the disciplinary skills outlined in the Common Core State Standards Many of today's middle school teachers like you want to find new ways to engage students in scientific practices and help students learn more from lab activities Argument Driven Inquiry in Physical Science does all of this while also giving students the chance to practice reading writing speaking and using math in the context of science **Physical Science** Frank Wyss, 2005-01-01 **Gender and Diversity: Concepts, Methodologies, Tools,**
