The History of Television, 1942 to 2000 Albert

Abramson,2007-09-29 Albert Abramson published with McFarland in 1987 a landmark volume titled The History of Television 1880 1941 massive research Library Journal voluminous documentation Choice many striking old photos The TV Collector At last he has produced the follow up volume the reader may be assured there is no other book in any language that is remotely comparable to it Together these two volumes provide the definitive technical history of the medium Upon the development in the mid 1940s of new cameras and picture tubes that made commercial television possible worldwide the medium rose rapidly to prominence Perhaps even more important was the invention of the video tape recorder in 1956 allowing editing re shooting and rebroadcasting This second volume 1942 to 2000 covers these significant developments and much more Chapters are devoted to television during World War II and the postwar era the development of color television Ampex Corporation s contributions television in Europe the change from helical to high band technology solid state cameras the television coverage of Apollo II the rise of electronic journalism television entering the studios the introduction of the camcorder the demise of RCA at the hands of GE the domination of Sony and Matsushita and the future of television in e cinema and the 1080 P24 format The book is heavily illustrated as is the first volume *The Last of the Imperious Rich* Peter Chapman,2010-09-02 On September 11 1844 Henry Lehman arrived in New York City on a boat from Germany Soon after he moved to Montgomery Alabama where he and his brother Emanuel established a modest cotton brokering firm that would come to be called Lehman Brothers On September 15 2008 Dick Fuld the last CEO of Lehman Brothers filed for corporate bankruptcy amid one of the worst financial crises in American history After 164 years one of the largest and most respected investment banks in the world was gone leaving everyone wondering How could this have happened Peter Chapman an editor and writer for The Financial Times answers this question by exploring the complete history of Lehman

Brothers between those two historic Septembers He takes us back to its early days as a cotton broker in Alabama and then to its glory days as one of the leading corporate financiers in America He also provides an intimate portrait of the people who ran Lehman over the decades from Henry Lehman the founder to Bobbie Lehman who led the company into the world of radio motion pictures and air travel in first part of the 20th century to Dick Fuld who allowed it to morph into a dealer of shoddy securities Throughout his account of this imperiously rich firm Chapman examines the impact Lehman Brothers had not only on American finance but also on American life As a major backer of companies like Pan American Airlines Macy's and RKO Lehman helped lead the country into major new industries and helped support some of its most intrepid entrepreneurs He then shows how starting in the 1980s Lehman's increased focus on short term gain investments led the firm down the dangerous path that would eventually lead to its demise In the end the story of Lehman Brothers is not only the story of a truly important American company but a cautionary tale of what happens when leaders lose sight of their core mission in their quest for something too good to be true Praise for *The Last of the Imperious Rich* Thought provoking and illuminating *The New York Times* Chapman has succeeded in holding up a mirror to America's past and what its future might hold Bloomberg New York Magazine, 1972-09-25 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **The Magic Window** Jim Von Schilling, 2013-10-28 This fascinating book tells the story of how television became popular in the United States following the medium's debut at the 1939 New York World's Fair You'll learn about the people events and performances that were televised or influenced what was being televised from 1939 to 1953 In addition to the entertainment and cultural aspects of this newborn medium it also explores the business politics and technology of early television *Interference Handbook*, 1986 Photoelectronic Imaging Devices Lucien Biberman, 2013-11-11 The past decade has seen a major resurgence in optics research and the teaching of optics throughout the major universities both in this country and abroad Electrooptical devices have become a challenging form of study that has penetrated both the electrical engineering and the physics departments of most major schools There seems to be something challenging about a laser that appeals to both the practical electrical engineer with a hankering for fundamental research and to the fundamental physicist with a hankering to be practical Somehow or other this same form of enthusiasm has not previously existed in the study of photoelectronic devices that form images This field of endeavor is becoming more and more so sophisticated as newer forms of solid state devices enter the field not only in the data processing end but in the conversion of radiant energy into electrical charge patterns that are stored manipulated and read out in a way that a decade ago would have been considered beyond some fundamental limit or other It is unfortunate however that this kind of material

has heretofore been learned only by the process of becoming an apprentice in one or more of the major development laboratories concerned with the manufacture of image intensifiers or television tubes or the production of systems employing these devices
