Dear Bernadette,

I have known John Smith for the past year while he has worked as an Accounting Assistant in the Company Accounting Office. I have been consistently impressed by both John's attitude towards his work and his performance on the job.

His interpersonal and communication skills have allowed him to develop productive working relationships with both our clients and our staff. John has the listening and interviewing skills necessary to extract information from our clientele while performing financial assessments.

John possesses solid writing skills which have enabled him to compose quality correspondence. He also has the analytical skills to diagnose problems and devise viable solutions. His ability to remain unflustered during frenzied periods like tax season proves his ability to work well under pressure.

I recommend him for employment without reservation. Please let me know if you need further information.

TEXTBOOK ON PHARMACEUTICAL REGULATORY AFFAIRS Dr. S. Valarmathi, Dr. Anasuya Patil, Dr. Abhishek Suman, Mr. Vinay Kumar Yanmandru, Dr. NARLA SUNITHA, Prof. (Dr.) Varsha Deva, 2023-08-04. This book is structured in TWO different parts. These parts are as follows: Part I emphasizes on GCP (Good Clinical Practices), GLP (Good Laboratory Practices), GMP (Good Manufacturing Practices), USFDA, NDA, ANDA, U.S. Food and Drug Administration's New Drug Approval, Abbreviated New Drug Approval, and TQM (Total Quality Management). GCP (Good Clinical Practices) is an international quality standard that is provided by the International Conference on Harmonization (ICH), an international body that defines standards which governments can transpose into regulations for clinical trials involving human subjects. Good Clinical Practice guidelines include protection of human rights as a subject in clinical trial. It also provides assurance of the safety and efficacy of the newly developed compounds. Good Clinical Practice Guidelines include standards on how clinical trials should be conducted, define the roles and responsibilities of clinical trial sponsors, clinical research investigators, and monitors. In the pharmaceutical industry, monitors are often called Clinical Research Associates. GLP (Good Laboratory Practices) deals with the organization process and conditions under which laboratory studies are planned, performed, monitored, recorded, and reported. GLP practices are intended to promote the quality and validity of test data. Published GLP regulations and guidelines have a significant impact on the daily operation of an analytical laboratory. GMP (Good Manufacturing Practices) Manufacturing relies on the ability to reproduce exactly a single product hundreds if not thousands of times. To make this possible, guidelines have been drawn up in most countries that are similar to the FDA ones described here that define GMPs.
