traces the genealogy of current musical practices and theoretical concerns drawing lines of connection between recent musical production and earlier moments of sonic experimentation It aims to foreground the various rewirings of musical composition and performance that have taken place in the past few decades and to provide a critical and theoretical language for this new audio culture This new and expanded edition of the Audio Culture contains twenty five additional essays including four newly commissioned pieces Taken as a whole the book explores the interconnections among such forms as minimalism indeterminacy musique concr te free improvisation experimental music avant rock dub reggae ambient music hip hop and techno via writings by philosophers cultural theorists and composers Instead of focusing on some crossover between high art and popular culture Audio Culture takes all these musics as experimental practices on par with and linked to one another While cultural studies has tended to look at music primarily popular music from a sociological perspective the concern here is philosophical musical and historical Audio Culture includes writing by some of the most important musical thinkers of the past half century among them John Cage Brian Eno Ornette Coleman Pauline Oliveros Maryanne Amacher Glenn Gould Umberto Eco Jacques Attali Simon Reynolds Eliane Radigue David Toop John Zorn Karlheinz Stockhausen and many others Each essay has its own short introduction helping the reader to place the essay within musical historical and conceptual contexts and the volume concludes with a glossary a timeline and an extensive discography

Dialogues in Music Therapy and Music

Neuroscience: Collaborative Understanding Driving Clinical Advances Julian O'Kelly,Jörg C. Fachner,Mari Tervaniemi,2017-06-30 Music is a complex dynamic stimulus with an unparalleled ability to stimulate a global network of neural activity involved in attention emotion memory communication motor co ordination and cognition As such it provides neuroscience with a highly effective tool to develop our understanding of brain function connectivity and plasticity Increasingly sophisticated neuroimaging technologies have enabled the expanding field of music neuroscience to reveal how musical experience perception and cognition may support neuroplasticity with important implications for the rehabilitation and assessment of those with acquired brain injuries and neurodegenerative conditions Other studies have indicated the potential for music to support arousal attention and emotional regulation suggesting therapeutic applications for conditions including ADHD PTSD autism learning disorders and mood disorders In common with neuroscience the music therapy profession has advanced significantly in the past 20 years Various interventions designed to address functional deficits and health care needs have been developed alongside standardised behavioural assessments Historically music therapy has drawn its evidence base from a number of contrasting theoretical frameworks Clinicians are now turning to neuroscience

which offers a unifying knowledge base and frame of reference to understand and measure therapeutic interventions from a biomedical perspective Conversely neuroscience is becoming more enriched by learning about the neural effects of real world clinical applications in music therapy While neuroscientific imaging methods may provide biomarking evidence for the efficacy of music therapy interventions it also offers important tools to describe time locked interactive therapy processes and feeds into the emerging field of social neuroscience Music therapy is bound to the process of creating and experiencing music together in improvisation listening and reflection Thus the situated cognition and experience of music developing over time and in differing contexts is of interest in time series data We encouraged researchers to submit papers illustrating the mutual benefits of dialogue between music therapy and other disciplines important to this field particularly neuroscience neurophysiology and neuropsychology The current eBook consists of the peer reviewed responses to our call for papers
