Storytelling Organizational Practices David M. Boje, 2014-06-20 Once upon a time the practice of storytelling was about collecting interesting stories about the past and converting them into soundbite pitches Now it is more about foretelling the ways the future is approaching the present prompting a re-storying of the past Storytelling has progressed and is about a diversity of voices not just one teller of one past it is how a group or organization of people negotiates the telling of history and the telling of what future is arriving in the present With the changes in storytelling practices and theory there is a growing need to look at new and different methodologies Within this exciting new book David M Boje develops new ways to ask questions in interviews and make observations of practice that are about storytelling the future This after all is where management practice concentrates its storytelling while much of the theory and method work is all about how the past might recur in the future Storytelling Organizational Practices takes the reader on a journey from looking at narratives of past experience through looking at living stories of emergence in the present to looking at how the future is arriving in ways that prompts a re-storying of the past

The Second Singularity Pravir Malik, 2019-11-24. It has been said that the future of Life is about Artificial Intelligence (AI) and that as AI advances a point will be reached the Singularity when humans will no longer have a clue as to what is going on nor why. Essentially as a species humans will at this point have been marginalized by a global singular intelligence whose capabilities far outstrip human intelligence. On the contrary, this book will make the case that the future of Life is enabled by the pre-existent complexity that exists in every iota of it and that there have already been a series of light-based epiphanies by virtue of which Life in its continuing complexities has emerged as partial singularities and further will culminate in a Second Singularity as more of our species consciously opens to the fullness of Light. The power and capabilities of the Second Singularity will far outstrip any AI-based singularity. This pre-existent complexity derives from the fact that Light exists in multiple states simultaneously. Hence there is a fundamental and single light-based edifice that informs our universe and it is by virtue of this light-based edifice that all matter, all life, all mind, and all emergences beyond the level of mind will surface. The future of life hence cannot be due to AI. At best AI can create a process by which many tasks that usually require utilization of the fundamental light-derived capacity of intelligence in order to be completed can be completed by an exhaustively repetitive running of algorithms driven by massive computing power, hence giving the illusion of intelligence. Projected forward, the exhaustively repetitive running of algorithms driven by massive computing power endow a practically ubiquitous digitally enabled strata to control many tasks and this may create the phenomenon of a singularity in which humankind effectively cannot even fathom how things are happening anymore and is seemingly outpaced and outthought at every step in every direction by an intelligence that appears to be all-knowing, all-present, and all-powerful. But this kind of singularity is fundamentally separated from the light-based edifice behind all things and from which all things rise. It is hence not a true singularity in the sense of a finite function assuming infinite value but is fundamentally limited in its scope by virtue of its disconnection from the founts of Life. This does not preclude an AI-based singularity from having massive practical power that can have an enormous destructive or constructive effect on humankind and material life. What it does mean though is that there is another singularity, a human-founded singularity, the Second Singularity, which can exceed the limits of any AI-based singularity due to its fundamental union with the light-based edifice that is behind and informs all of Life. The possible human-founded singularity it will be discovered is one in a long series of naturally occurring though.

partial singularities that derive their existence from a fundamental union with the light based edifice behind all things Such partial singularities are characterized by having all the power of the light edifice behind them though the emergences in such partial singularities are not necessarily aware of their oneness with the light based edifice In the Second Singularity humans become aware of such oneness becoming conscious projections animated by a single intelligence love and power of which they are a part It is hence no more the human level capacity that drives such humans but the infinite capacities of the one light based edifice that drives This book focuses on the mathematics of emergence of these naturally occurring partial singularities leading up to the possible human founded singularity that will endow humankind with the potential for extraordinary capacities

The Return of Ethics and Spirituality in Global Development Mahmoud Masaeli,Rico Sneller,2020-06-02 The theory of modernization basically reduces the meaning of development to economic growth often measured by Growth Domestic Product of the country or overall purchase power parity of the nation This approach ignores the variety of perspectives on development hence excludes the role of culture identity and spirituality as social determinants of good development More importantly modernization theory which informs the mainstream view on development ignores the structural causes of underdevelopment including colonial heritage or the current unbridled capitalism in many societies Against reductionist views of development fundamental questions are raised about the theory and programming of development From what perspective is the conception of development perceived Who should decide and depict development goals What kind of development could result in desirable changes Is it morally desirable to dictate an exclusively Western understanding of development to others Is there any link between development and a right of nations to self determination Who is morally accountable for global inequality or bad development The novelty of this book lies in its multidisciplinary approach in exploring the role of ethics and spirituality as the curing alternates for the gamut of ills which originate in global inequality All authors are academics based in a variety of countries and specialize in questions concerning development and spirituality

Books in Print Supplement ,2002 [Approaches to Offender Rehabilitation in Asian Jurisdictions](#) Chi Meng Chu,Michael Daffern,2024-04-04 This book aims to understand how Asian jurisdictions conceptualise rehabilitation within both the correctional and forensic mental health sectors Little has been written about rehabilitation practices for people in criminal justice and forensic mental health services in Asia Although there is some recognition of the need to develop and or adjust rehabilitation practices for non white non western peoples in Western jurisdictions the extent to which Western derived practices have been considered adjusted or adopted in Asian countries is not well known This book includes contributions from an international team who explore the ways in which history culture religion and resources impact how rehabilitation is conceptualised and offered in multiple Asian countries It aims to provide an understanding of the relative merits of contemporary Western practices across different Asian countries and consider how these practices have been adopted and adapted within correctional and forensic mental health sectors This book is essential for administrators who are

developing rehabilitation strategies and for practitioners working with people who have a history of offending behaviour
