The Medical Library Association Guide to Data Management for Librarians Lisa Federer, 2016-09-15
Technological advances and the rise of collaborative interdisciplinary approaches have changed the practice of research The 21st century researcher not only faces the challenge of managing increasingly complex datasets but also new data sharing requirements from funders and journals Success in today's research enterprise requires an understanding of how to work effectively with data yet most researchers have never had any formal training in data management Libraries have begun developing services and programs to help researchers meet the demands of the data driven research enterprise giving librarians exciting new opportunities to use their expertise and skills The Medical Library Association Guide to Data Management for Librarians highlights the many ways that librarians are addressing researchers changing needs at a variety of institutions including academic hospital and government libraries Each chapter ends with pearls of wisdom a bulleted list of 5-10 takeaway messages from the chapter that will help readers quickly put the ideas from the chapter into practice From theoretical foundations to practical applications this book provides a background for librarians who are new to data management as well as new ideas and approaches for experienced data librarians *General Technical Report INT.* ,1983 **Grid Computing**

Fran Berman, Geoffrey Fox, Anthony J. G. Hey, 2003-04-18
Grid computing is applying the resources of many computers in a network to a single problem at the same time Grid computing appears to be a promising trend for three reasons 1 Its ability to make more cost effective use of a given amount of computer resources 2 As a way to solve problems that can't be approached without an enormous amount of computing power 3 Because it suggests that the resources of many computers can be cooperatively and perhaps synergistically harnessed and managed as a collaboration toward a common objective A number of corporations professional groups university consortiums and other groups have developed or are developing frameworks and software for managing grid computing projects The European Community EU is sponsoring a project for a
