

This report is separated into paragraphs,  
which each give information about a  
particular aspect of the animal.  
The topic of each paragraph is made  
clear by the sub-headings.

Thinking about the  
information you have  
about your animal, what  
**sub-headings** could you  
use in your report?

BACK

Think, pair, then share your ideas.

### What is a sloth?

A sloth is a mammal found in the northwestern of Central and South America. There are two types of sloth – two-toed sloths and three-toed sloths.

#### Appearance

Sloths have long hairy, round heads and thick skin. They have long sharp claws for climbing trees and hanging from branches. Their fur often has a green tinge caused by the algae that grows on it. The algae can help camouflage the sloth, and help to keep predators such as eagles, snakes and jaguars.

A three-toed sloth.

A two-toed sloth.

#### Habitat

Sloths are arboreal animals – this means that they spend most of their time in trees. They eat, sleep and even give birth hanging upside down from branches. Sloths only come down from the trees to go to the toilet.

#### Diet

Sloths mostly eat leaves, twigs, buds and shoots, but they have been known to occasionally eat insects and birds. They have an extremely slow digestion process which takes up most of their body's energy – one sloth can take a month of food to fully digest!

#### Movement

Sloths move extremely slowly. They crawl through the trees at an average speed of just a centimetre an hour, and can take almost an hour to move up or down a tree. They are however, good swimmers, and can move up to three times faster in the water.

#### Did you know...?

- Some two-toed sloths can move backwards!
- Sloths can survive up to a month without eating.
- They also go to the toilet upside down.
