Saxon Early Learning Curriculum:

Assessment and Documentation in Early Childhood Education Maarit Alasuutari, Ann-Marie Markström, Ann-Christine Vallberg-Roth, 2014-01-21 Documentation in early childhood education is typically seen as a means to enhance the quality of care and education and as a way to take account of the child's view. Assessment and Documentation in Early Childhood Education considers the increasing trend towards systematic child documentation especially in early childhood institutions. The authors present ways in which assessment and evaluation is done sometimes explicitly but more often implicitly in these practices and explore its means, aims, forms and functions. They also examine the rationalities of child documentation from the perspective of professional practice and professionalism and suggest that documentation and assessment practices can weaken and constrain but also empower and strengthen teachers, children and parents. Topics explored include Different forms of documentation and assessment, Documentation and listening to the children, Dilemmas of assessment and documentation, Participation by children, Involvement of parents. This timely book will be appealing for those studying in the field of early childhood education, teacher education, special education, general education, social work, counselling, psychology, sociology, childhood studies and family studies.

Advancing Knowledge and Building Capacity for Early Childhood Research Sharon Ryan, M. Elizabeth Graue, Vivian L. Gadsden, Felice J. Levine, 2021-01-20 This volume employs a multidisciplinary approach to research on a high profile topic very much on the agenda of state and national policy leaders: early childhood development and education. It aims to reflect how scholarly perspectives shape the contours of knowledge generation and to illuminate the gaps that prevent productive interchange among scholars who value equity in the opportunities available to young children, their families and teachers/caregivers. The editors and authors identify and prioritize critical research areas, assess the state of the field in terms of promising research designs and methodologies and identify capacity building needs and potential cross group collaborations.

Early Childhood Policies and Systems in Eight Countries Tony Bertram, Chris Pascal, 2016-07-29 This report provides an overview of policy strategies on early childhood education settings from birth to primary schooling in eight countries. Data were collected using a policy questionnaire addressed to and completed by the National Research Coordinator's NRC of Chile, the Czech Republic, Denmark, Estonia, Italy, Poland, the Russian Federation and the United States. The countries that participated provide interesting illustrations of early childhood education policy in action in a range of diverse contexts. Analysis of the systemic and structural results of ECE policy at national and where necessary subnational levels enables transnational comparisons in policy and systems. Key policy changes both underway and planned are documented. These data reveal key findings in each of the five policy areas as covered in the questionnaire and this report: public policy, delivery models and providers, participation and enrollment, quality assurance systems and expectations for child outcomes. In particular, the study aims to provide meaningful information for countries, states and jurisdictions across the world in relation to early childhood education, mapping the systems structures.

and user pathways in place along with the perceptions of stakeholders about the system its functioning and impact This comprehensive assessment of the wider policy contexts and settings for early childhood education includes teacher practitioner qualifications pedagogy approaches and opportunities for professional development Such information will enable countries to review their early childhood education systems in an international context **Quality Matters in Early**
