Semantic Role Labeling Daniel Gildea

Joacim Rocklöv

Semantic Role Labeling Daniel Gildea:

Semantic Role Labeling Martha Stone Palmer, Daniel Gildea, Nianwen Xue, 2010 This book is aimed at providing an overview of several aspects of semantic role labeling Chapter 1 begins with linguistic background on the definition of semantic roles and the controversies surrounding them Chapter 2 describes how the theories have led to structured lexicons such as FrameNet VerbNet and the PropBank Frame Files that in turn provide the basis for large scale semantic annotation of corpora This data has facilitated the development of automatic semantic role labeling systems based on supervised machine learning techniques Chapter 3 presents the general principles of applying both supervised and unsupervised machine learning to this task with a description of the standard stages and feature choices as well as giving details of several specific systems Recent advances include the use of joint inference to take advantage of context sensitivities and attempts to improve performance by closer integration of the syntactic parsing task with semantic role labeling Chapter 3 also discusses the impact the granularity of the semantic roles has on system performance Having outlined the basic approach with respect to English Chapter 4 goes on to discuss applying the same techniques to other languages using Chinese as the primary example Although substantial training data is available for Chinese this is not the case for many other languages and techniques for projecting English role labels onto parallel corpora are also presented Table of Contents Preface Semantic Roles Available Lexical Resources Machine Learning for Semantic Role Labeling A Cross Lingual Perspective Summary

Natural Language Data Management and Interfaces Yunyao Li, Davood Rafiei, 2022-06-01 The volume of natural language text data has been rapidly increasing over the past two decades due to factors such as the growth of the Web the low cost associated with publishing and the progress on the digitization of printed texts This growth combined with the proliferation of natural language systems for search and retrieving information provides tremendous opportunities for studying some of the areas where database systems and natural language processing systems overlap This book explores two interrelated and important areas of overlap 1 managing natural language data and 2 developing natural language interfaces to databases It presents relevant concepts and research questions state of the art methods related systems and research opportunities and challenges covering both areas Relevant topics discussed on natural language data management include data models data sources queries storage and indexing and transforming natural language text Under natural language interfaces it presents the anatomy of these interfaces to databases the challenges related to query understanding and query translation and relevant aspects of user interactions Each of the challenges is covered in a systematic way first starting with a quick overview of the topics followed by a comprehensive view of recent techniques that have been proposed to address the challenge along with illustrative examples It also reviews some notable systems in details in terms of how they address different challenges and their contributions Finally it discusses open challenges and opportunities for natural language management and interfaces The goal of this book is to provide an introduction to the methods problems and solutions that

are used in managing natural language data and building natural language interfaces to databases It serves as a starting point for readers who are interested in pursuing additional work on these exciting topics in both academic and industrial environments

Semantics John I. Saeed, 2022-11-30 The latest edition of the bestselling introduction to the field of linguistic semantics updated throughout and featuring a wholly new chapter on inferential pragmatics *Semantics Fifth Edition* is a comprehensive and well balanced introduction to the study of the communication of meaning in language Assuming no previous background in semantics and limited familiarity with formal linguistics this student friendly textbook describes the concepts theory and study of semantics in an accessible and clear style Concise chapters describe the role of semantics within contemporary linguistics cover key topics in the analysis of word and sentence meaning and review major semantic theories such as componential theory formal semantics and cognitive semantics The updated fifth edition incorporates recent theoretical developments and important research in linguistic semantics featuring an entirely new chapter examining the overlap between inferential pragmatics and Relevance Theory truth conditional meaning and other traditional areas of semantics Revised and expanded sections discuss the continuing growth and consolidation of cognitive semantics various contextual features of language conceptualization and categorization and construal and perspective This edition includes new exercises with solutions up to date references to relevant literature and additional examples with data from a wide range of different languages Covers basic concepts and methods as well as key theoretical models current lines of research and important writers Explains general concepts in semantics before gradually moving to more advanced topics in semantic description and theoretical approaches Highlights the relation between cross linguistic variation and language universals Provides students with the background necessary to understand more advanced and specialized primary semantics literature Includes a glossary of technical terms and numerous exercises arranged by level of difficulty Highlights the relationship between semantics and cross linguistic variation language universals and pragmatics With detailed examples from a wide range of contexts and a wealth of practical exercises *Semantics Fifth Edition* remains the perfect textbook for undergraduate students of linguistics English language applied linguistics modern languages and computer sciences

The Swedish FrameNet++ Dana Dannélls, Lars Borin, Karin Friberg Heppin, 2021-11-26 Large computational lexicons are central NLP resources Swedish FrameNet aims to be a versatile full scale lexical resource for NLP containing many kinds of linguistic information Although focused on Swedish this ongoing effort which includes building a new Swedish framenet and recycling existing lexicons has offered valuable insights into general aspects of lexical resource building for NLP which are discussed in this book computational and linguistic problems of lexical semantics and lexical typology the nature of lexical items words and multiword expressions achieving interoperability among heterogeneous lexical content NLP methods for extending and interlinking existing lexicons and deploying the new resource in practical NLP applications This book is targeted at everyone with an interest in lexicography computational lexicography lexical typology lexical semantics

linguistics computational linguistics and related fields We believe it should be of particular interest to those who are or have been involved in language resource creation development and evaluation

ECAI 2006 Silvia Coradeschi, Anna Perini, Paolo Traverso, 2006-08-15 In the summer of 1956 John McCarthy organized the famous Dartmouth Conference which is now commonly viewed as the founding event for the field of Artificial Intelligence During the last 50 years AI has seen a tremendous development and is now a well established scientific discipline all over the world Also in Europe AI is in excellent shape as witnessed by the large number of high quality papers in this publication In comparison with ECAI 2004 there s a strong increase in the relative number of submissions from Distributed AI Agents and Cognitive Modelling Knowledge Representation Reasoning is traditionally strong in Europe and remains the biggest area of ECAI 06 One reason the figures for Case Based Reasoning are rather low is that much of the high quality work in this area has found its way into prestigious applications and is thus represented under the heading of PAIS

Computational Linguistics, 2002

Effective Statistical Models for Syntactic and Semantic Disambiguation Kristina Nikolova Toutanova, 2005

Biblical Hebrew Grammar Visualized Francis I. Andersen, A. Dean Forbes, 2012-04-01 In Biblical Hebrew Grammar Visualized Andersen and Forbes approach the grammar of Biblical Hebrew from the perspective of corpus linguistics Their pictorial representations of the clauses making up the biblical texts show the grammatical functions subject object and so on and semantic roles surrogate time interval and so on of clausal constituents as well as the grammatical relations that bind the constituents into coherent structures The book carefully introduces the Andersen Forbes approach to text preparation and characterization It describes and tallies the kinds of phrases and clauses encountered across all of Biblical Hebrew It classifies and gives examples of the major constituents that form clauses focusing especially on the grammatical functions and semantic roles The book presents the structures of the constituents and uses their patterns of incidence both to examine constituent order word order and to characterize the relations among verb corpora It expounds in detail the characteristics of quasiverbals verbless clauses discontinuous and double duty clausal constituents and supra clausal structures The book is intended for students of Biblical Hebrew at all levels Beginning students will readily grasp the basic grammatical structures making up the clauses because these are few and fairly simple Intermediate and advanced students will profit from the detailed descriptions and comparative analyses of all of the structures making up the biblical texts Scholars will find fresh ways of addressing open problems while gaining glimpses of new research approaches and topics along the way

ACL 2007 Association for Computational Linguistics. Meeting, 2007

Artificial Intelligence and Computer Science Susan Shannon, 2005 This book presents leading edge research in the field of computer research technology and applications Each contribution has been carefully selected for inclusion based on the significance of the research to the field Summaries of all chapters are gathered at the beginning of the book and an in depth index is presented to facilitate access

Statistical Language Understanding Using Frame Semantics Daniel Joseph Gildea, 2001

3rd IEEE International Conference

on Data Mining Xindong Wu, 2003 ICDM 03 brings together researchers and practitioners who describe their original research results and practical development experiences in Data Mining technology. The papers explore subjects in many related data mining areas such as machine learning, automated scientific discovery, statistics, pattern recognition, knowledge acquisition, soft computing, databases, data warehousing, data visualization, and knowledge based systems. Data mining is an emerging and highly interdisciplinary field. The ICDM 03 proceedings cover a broad and diverse range of topics related to data mining theory, systems, and applications. *EACL 2003* Association for Computational Linguistics. European Chapter.
