Charter School Report Card Shawgi Tell, 2016-04-01 What is a charter school Where do they come from Who promotes them and why What are they supposed to do Are they the silver bullet to the ills plaguing the American public education system This book provides a comprehensive and accessible overview and analysis of charter schools and their many dimensions It shows that charter schools as a whole lower the quality of education through the privatization and marketization of education The final chapter provides readers with a way toward rethinking and remaking education in a way that is consistent with modern requirements Society and its members need a fully funded high quality public education system open to all and controlled by a public authority *Maximizing Social Science Research Through Publicly Accessible Data Sets* Perry, S. Marshall, 2017-10-31 Making research in all fields of study readily available is imperative in order to

circulate new information and upcoming trends This is possible through the efficient utilization of collections of information *Maximizing Social Science Research Through Publicly Accessible Data Sets* is an essential reference source for the latest academic perspectives on a wide range of methodologies and large data sets with the purpose of enhancing research in the areas of human society and social relationships Featuring coverage on a broad range of topics such as student achievement teacher efficacy and instructional leadership this book is ideally designed for academicians researchers and practitioners seeking material on the availability and distribution methods of research content **Report Cards** Wade H.

Morris, 2023-09-26 The definitive history of the report card Report cards represent more than just an account of academic standing and attendance The report card also serves as a tool of control and as a microcosm for the shifting power dynamics among teachers parents school administrators and students In *Report Cards A Cultural History* Wade H Morris tells the story of American education by examining the history of this unique element of student life In the nearly two hundred year evolution of the report card this relic of academic bookkeeping reflected broader trends in the United States the republican zealotry and religious fervor of the antebellum period the failed promises of postwar Reconstruction for the formerly enslaved the changing gender roles in newly urbanized cities the overreach of the Progressive child saving movement in the early twentieth century and by the 1930s the increasing faith in an academic meritocracy The use of report cards expanded with the growth of school bureaucracies becoming a tool through which administrators could surveil both student activity and teachers And by the late twentieth century even the most radical critics of numerical reporting of children have had to compromise their ideals Morris traces the evolution of how teachers students parents and administrators have historically responded to report cards From a western New York classroom teacher in the 1830s and a Georgia student in the 1870s who was born enslaved to a Colorado student incarcerated in the early 1900s and the son of Russian Jewish immigrants applying to college in the 1930s *Report Cards* describes how generations of people have struggled to maintain dignity within a system that reduces children to numbers on slips of paper **A Smarter Charter** Richard D. Kahlenberg, Halley Potter, 2014-09-19

Moving beyond the debate over whether or not charter schools should exist A Smarter Charter wrestles with the question of what kind of charter schools we should encourage The authors begin by tracing the evolution of charter schools from Albert Shanker s original vision of giving teachers room to innovate while educating a diverse population of students to today s charter schools where student segregation levels are even higher than in traditional public schools In the second half of the book the authors examine two key reforms currently seen in a small but growing number of charter schools socioeconomic integration and teacher voice that have the potential to improve performance and reshape the stereotypical image of what it means to be a charter school

Organizational Report Cards William T. Gormley Jr.,David L. Weimer,1999-03 In recent years consumers professional organizations government officials and third party payers have become increasingly concerned about how to assess the quality of the services provided by organizations in both the private and the public sectors One new approach is the organizational report card which compares the performance of organizations such as public schools colleges hospitals and HMOs This book offers the first comprehensive study of such instruments It discusses the circumstances under which they are desirable alternatives to other policy instruments such as regulation how they should be designed who is likely to use them and for what purpose and what role if any government should have in their creation Informed by cases drawn from education health and other policy areas this book develops a conceptual framework for analyzing these issues It explores the tradeoffs in measuring performance the methods of communicating results effectively to mass and elite audiences and the ways in which organizations respond to the data gathered

How School Principals Sustain Success over Time Leif Moos,Olof Johansson,Christopher Day,2011-05-26 This work represents a publishing event in education research Genuinely groundbreaking it is the result of longitudinal research from five nations over five years The authors set themselves an unprecedented task to analyze how it is that successful school principals sustain positive outcomes over a significant period of time To find out they initiated the International Successful School Principal Project ISSPP assembling 30 multinational case histories and numerous comparative analyses In doing so they recorded fresh perspectives on the influence school principals can have on their schools the quality of teaching in their classrooms and student outcomes Revisiting the subject schools in 2007 they found many principals still in place having steered their organizations through various minefields of political governance and educational reform As the most penetrating longitudinal investigation of the subject this research has unearthed fascinating new insights into school leadership that add real substance to the sum of our knowledge It incorporates data from educational systems in Australia Denmark Norway Sweden England and the USA One key finding is that while all principals delegate a range of leadership tasks successful ones distribute responsibility on a case by case basis founded on personal assessments of their staff as well as on organizational and policy contexts The research also demonstrates that successful principals maintain close communication with their staff and the wider school environment and that they are adaptive maximizing the opportunities presented by new political contexts and expectations yet without

losing sight of their school's core moral and ethical principles The volume's international thematic analysis has allowed comparative conclusions to be drawn on what the principals do to sustain and foster pedagogical and institutional success

Controls and Choices Carl L. Bankston III, Stephen J. Caldas, 2015-07-08 Many activists and writers have ascribed continuing racial segregation in American schools to a failure of will In this view forced transfers of students and other aggressive judicially mandated policies would lead to greater equality in education if only legislators and judges had the will to continue trying to make school districts conform to plans for redesigning schools and even American society Controls and Choices The Educational Marketplace and the Failure of School Desegregation provides a detailed examination of the nature of the educational marketplace supported by historical evidence to argue that school desegregation failed because it involved monopolistic efforts at redistributing opportunities These efforts were fundamentally at odds with the self interest of the families who had the greatest ability to make choices in the educational marketplace The authors use the concept of the educational marketplace to explain how market based attempts at school reform notably vouchers and charter schools have grown out of the failure of desegregation and remain hampered by lack of recognition of how the schools really function as markets Some additional key features of this book include Gives a clear understanding of how schools function as markets Illustrates the argument with histories of specific school districts Links the history of school desegregation to school vouchers and charter schools Includes easy to read and interpret graphs and figures Includes most up to date school population and census information

2005 New York State Statistical Yearbook Michael Cooper, 2006

Charting Reform, Achieving Equity in a Diverse Nation Gail L. Sunderman, 2013-05-01 This book examines what equity means in a nation where the schools are becoming more diverse The authors consider how well our educational reform policies often framed in the language of equity and opportunity measure up to the challenges of achieving equity in a diverse nation While there is growing awareness of the increasing racial ethnic and socioeconomic diversity of the nation there is little recognition of how these trends affect the schools particularly in formerly homogeneous communities At the same time inequalities in student achievement between different racial ethnic and socioeconomic groups persist even as educational policy has intensified the focus on the achievement gap These two challenges make definitions of equity and opportunity as urban problems obsolete and call for a critical examination of educational policy and reform from an equity perspective Central themes include the critical examination of how equity is conceived under the law and in policy the experiences of minority students in suburban schools and the impact of current reform policies and strategies for achieving greater educational opportunities for all students This book is designed for graduate and undergraduate courses in educational policy and policy analysis for policymakers interested in a critical examination of current reform policies and options and educational leaders and administrators struggling with the implementation of reform mandates From a policy perspective it includes a survey of the evolution of educational policies and reforms since the 1960s and traces the mix of legal and legislative legacies that

have informed educational policy and equity It describes how trends in suburban diversification affect the schools something that has largely escaped the attention of educational reformers It provides school based and non school based remedies for achieving equity in diversifying suburban communities and articulates alternatives to the current accountability for performance approach It offers new and innovative analyses of current approaches to school reform including an analysis of how accountability tests can create the illusion of reducing the achievement gap and an examination of the paradoxes of federally funded compensatory policies that incorporate market based strategies Novel approaches such as social emotional learning and placed based college access strategies are examined through an equity lens **Reimagining School**

Integration Jennifer B. Ayscue, 2024-08-01 Since the peak of school desegregation in the late 1980s schools across the nation have been resegregating such that schools are now as segregated as they were during the late 1960s Segregation is systematically linked to unequal educational opportunities and outcomes while integration when well structured is associated with numerous short term and long term academic and social benefits for individuals and society In a time when public education is under attack and our nation is deeply divided along the lines of race class and politics the potential of integration to create more equitable educational opportunities and outcomes for individual students as well as greater social cohesion for our democratic pluralistic society is more important than ever Seventy years after the Supreme Court's landmark *Brown v Board of Education* decision ruled that segregated schools are inherently unequal this book reimagines what integration is and could be in our nation's current context of racial and political polarization the expansion of unregulated choice in public education and an increasingly diverse multiracial public school enrollment Through an exploration of research and policy this book develops a new conceptualization of integration by describing the contemporary drivers of segregation and recommending strategies to create a more equitable meaningful equal status form of educational integration for the future This book is a valuable resource for policymakers scholars educators and concerned citizens who are invested in learning about one way to help create a more equitable and just education system [Reviewing the Success of Full-Service Community Schools in the US](#) Mavis G. Sanders, Claudia Galindo, 2020-03-05 Originally published as a special issue of the *Journal of Education for Students Placed at Risk* this expanded text provides new insights into the successful sustained implementation of Full Service Community Schools (FSCSs) in the United States *Reviewing the Success of Full Service Community Schools in the US* documents the experiences of students teachers and communities involved in the establishment and growth of FSCSs By considering how successful this reform strategy has been in meeting the needs of underserved communities the text illustrates the potential these schools have to transform students learning and outcomes In particular the studies illustrate the value these schools have in supporting low income students and students of color At the same time by interrogating the defining pillars of FSCSs expanded learning opportunities integrated services family and community engagement and collaborative leadership chapters identify challenges that if left unattended could limit the

transformative potential of this reform strategy This groundbreaking text will be of great interest to graduate and postgraduate students researchers academics professionals and policy makers in the fields of Educational Change and School Reform Multicultural Education Sociology of Education Education Policy and School Management and Administration

Remaking Post-Industrial Cities Donald K. Carter, 2016-03-02 Remaking Post Industrial Cities Lessons from North America and Europe examines the transformation of post industrial cities after the precipitous collapse of big industry in the 1980s on both sides of the Atlantic presenting a holistic approach to restoring post industrial cities Developed from the influential 2013 Remaking Cities Congress conference chair Donald K Carter brings together ten in depth case studies of cities across North America and Europe documenting their recovery from 1985 to 2015 Each chapter discusses the history of the city its transformation and prospects for the future The cases cross cut these themes with issues crucial to the resilience of post industrial cities including sustainability doing more with less public engagement and equity social economic and environmental the most important issue cities face today and for the foreseeable future This book provides essential lessons learned from the mistakes and successes of these cities and is an invaluable resource for practitioners and students of planning urban design urban redevelopment economic development and public and social policy

Contemporary Critical Discourse Studies Christopher Hart, Piotr Cap, 2014-11-07 CDS is a multifarious field constantly developing different methodological frameworks for analysing dynamically evolving aspects of language in a broad range of socio political and institutional contexts This volume is a cutting edge interdisciplinary account of these theoretical and empirical developments It presents an up to date survey of Critical Discourse Studies CDS covering both the theoretical landscape and the analytical territories that it extends over It is intended for critical scholars and students who wish to keep abreast of the current state of the art The book is divided into two parts In the first part the chapters are organised around different methodological perspectives for CDS history cognition multimodality and corpora among others In the second part the chapters are organised around particular discourse types and topics investigated in CDS both traditionally e g issues of racism and gender inequality and only more recently e g issues of health public policy and the environment This is altogether an essential new reference work for all CDS practitioners

Childhoods Gaile Sloan Cannella, Lourdes Diaz Soto, 2010 For the past 20 years a range of scholars educators and cultural workers have examined dominant discourses of childhood using critical feminist and other postmodern perspectives Located in a variety of disciplines these poststructural deconstructive and even postcolonial critiques have challenged everything from notions of the universal child to adult child dualisms to deterministic developmental theory The purpose of this volume is to acknowledge the profound contributions of that large body of literature while demonstrating the ways that critical analyses can be used to generate avenues actions that increase possibilities for social justice for those who are younger while at the same time avoiding determinism In this time of globalization hyper capitalism and discourses that would control and disqualify through constructions like accountability we

believe that projects such as this are of utmost importance The volume is divided into four major sections to reflect the multiplicity of human voices and perspectives section I contemporary circumstances and dominant discourses within which we all attempt to function sections II and III and the generation of new possibilities for constructing relationships together section IV Finally a voice from the heart within a reconceptualist social science agenda for early childhood studies is presented

Anatomy of a Model Student Dr.Tyrone Bennett,2015-09-24 The attempts of fixing our nations school system since 1964 have not been a walk in the park Several legislations and laws have been reformed to improve ways to implement the improvement plans in our school system Looking back at the anatomy of our education system in the last fifty years brings up very few solutions as to what direction is righteously affordable for the next generation Whether you talk about equality of education or legislation for the common standards for K12 what really matters is how well our next generation of youth is ready for the twenty first century workforce and or college pathways This book was written on behalf of students teachers and parents who lack the understanding guidance stability and hope in the twenty first century educational system This is a system of turmoil We have seen changes over the last fifty years yet millions of students from elementary to freshmen year in college are suffering academically Many are failing and few are making the grade Our nation ranks below the top 20 worldwide in math and science and we are not moving fast enough to change it It is very important to note that students of all ages can benefit from this book to improve their education and get the much needed support academically through counseling and mentoring Parents and students need advisement Students need to know what tools are available to succeed in their academic affairs and parents need to know if those tools are adequate Education is the key for success and perseverance unlocks the door This book opens the door to a rewarding career and best decision making for a prosperous future and allows students to grasp a better understanding of what it means to be educated This book gives the essence of where we were and where we are headed Many students dont know how to study and lack the understanding of why reading is important Millions of students come to school with raw minds and starving brains This book looks at the mind of a teenager and the brain In this book youll learn about proper nutrition that will enhance the mind and spark the thinking cells As you read this guide you will learn more and more answers to readiness for the twenty first century workplace and the needed skills to succeed *Anatomy of a Model Student* dares to speak out on whats wrong with todays youth and behavior issues that hinder learning This book is the bible of educational fitness for parents and educators alike It will empower encourage and mesmerize its readers so please read it to be wise practice it to be educated

Closing America's High-achievement Gap: A Wise Giver's Guide to Helping Our Most Talented Students Reach Their Full Potential Andy Smarick,2013-10-22 This intriguing book makes a powerful case for a sorely needed U S educational improvement that has been almost entirely overlooked During the last two decades philanthropists and education reformers have made urgent efforts to pull weak students up to levels of basic competency Though that vital work is incomplete there is evidence of

progress among low achievers Meanwhile though children at the other end of the achievement spectrum have gotten lost in the shuffle Programs and funding once aimed at stimulating high potential students to make the most of their talents have withered and we are now doing a poor job of stimulating our quick learners When the particular needs of high potential students are not met by schools that is a moral failure because every child deserves to be stretched and challenged It is also a threat to our national interests since high achievers will be crucial to America s future ability to compete internationally This is a field where donors have wide open opportunities to lead In the pages of this fresh practical guidebook savvy school reform philanthropists will be introduced to scores of programs and institutions that can pull talented students of all ages races and income levels up to their full natural capabilities *The Death and Life of the Great American School System* Diane Ravitch,2010-03-02 Discusses how school choice misapplied standards of accountability the No Child Left Behind mandate and the use of a corporate model have all led to a decline in public education and presents arguments for a return to strong neighborhood schools and quality teaching **Bilingualism for All?** Nelson Flores,Amelia Tseng,Nicholas Subtirelu,2020-12-16 It is common for scholarly and mainstream discourses on dual language education in the US to frame these programs as inherently socially transformative and to see their proliferation in recent years as a natural means of developing more anti racist spaces in public schools In contrast this book adopts a raciolinguistic perspective that points to the contradictory role that these programs play in both reproducing and challenging racial hierarchies The book includes 11 chapters that adopt a range of methodological techniques qualitative quantitative and textual disciplinary perspectives linguistics sociology and anthropology and language foci Spanish Hebrew and Korean to examine the ways that dual language education programs in the US often reinforce the racial inequities that they purport to challenge Performance Report of Educational and Vocational Services and Results for Individuals with Disabilities ,1998 Canaries Reflect on the Mine Jeanne Cameron,2012-12-01 In *Canaries Reflect on the Mine* Dropouts Stories of Schooling Jeanne Cameron invites the reader to see schooling and early school leaving through the eyes of high school dropouts themselves The transcendent desires revealed by this research to be known and valued to learn with purpose and autonomy are spoken with poignant clarity by the young people who story these pages This study offers a compelling and timely critique of the dominant neoliberal discourse on schooling and early school leaving It challenges conventional wisdom about dropouts and shows how the experiences and needs of those who leave school early and those who persist to graduation are more similar than different Collectively these young people s stories evoke a canary in the mine metaphor one where the canaries exit and the miners remain They implore us to see the dropout crisis as a symptom of the alienating and dehumanizing school practices advanced by No Child Left Behind and Race to the Top More importantly they offer a vision for schooling that lovingly embraces and extends all students experiences enriches their biographies and celebrates and supports each of their talents and purposes with equal passion Pre service and in service teachers educational researchers and policy makers

administrators and advocates for equitable and democratic schooling have much to learn from this book Qualitative researchers will find a powerful model for working collaboratively with youth to represent their experiences and to craft solutions to the challenges they face Students of sociology will discover a compelling illustration of C Wright Mills sociological imagination and his charge to take it big by drawing connections between individual biographies and the social and historical structures that frame lived experience For professional social scientists it embodies Mills challenge to embrace the moral sensibilities required to understand and improve the human condition
